316-318 WALNUT ST. INCINNATI, OHIO.

Instructions to Purchasers

LL SEEDS IN PACKETS, OUNCES and QUARTER POUNDS only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities, if to be sent by Mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

Order Early.—It will greatly facilitate shipments if orders are sent early. We aim to send off all orders the day received, but during the busy season it is nearly impossible—hence the advisability of ordering early.

Customers who buy at our counters, or wish to pay their own express charges may deduct ten cents per pound on all seeds bought by the pound, if quoted at prepaid rates.

Send the Money with the Order.—Postal Note, Post Office Order, Registered Letter, Express Money Order, or Draft on Cincinnati or New York.

In view of the fact that the express companies make a special low rate on small packages of Seeds, Plants and Bulbs, we would suggest that patrons remit by Express Money Orders, which can be obtained at nearly all the express offices.

United States Postage Stamps will be received for small amounts; be exceedingly careful about the least moisture getting on them when remitting, as they sometimes reach us so stuck together as to be almost worthless.

We do not send C. O. D.—Everything being plainly priced, the return charges on money is an unnecessary expense.

Should you change your address, we will esteem it a favor if you will notify us, so we can forward our Catalogue with regularity; if you receive two Catalogues of the same kind, please hand one to some friend who has a garden.

Should an error occur, we desire to be promptly informed, and will take pleasure in making satisfactory corrections.

Write your Name and Address distinctly and in full; please use the Order Sheet and Envelope inserted in this Catalogue.

We shall always be pleased to reward customers who send us the name and post office address of their friends who will buy Seeds, Plants, Bulbs, etc.

About Warranting Seeds.—We have often been asked if we "guarantee or warrant our Seeds." We beg to state plainly we do not, for the reason that practical experience has assured us of the fact that crops may fail, no matter how fresh or pure the seed sown may be. We trust that our customers will fully realize that it is to our interest to send none but the very best quality of Seeds. It would be folly to do otherwise, unless we wanted to sacrifice our good reputation for selling Reliable Seeds, which we are constantly striving to extend.

To secure success, however, it is necessary that the customer should do his part well, or our good seeds will be ruined. With the best of management and with good seeds there will be an occasional unaccountable failure. The best of gardeners sometimes fail, and try again with the same seed with good results.

We test all our Seeds before sending them out, and while we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept Seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

J. M. McCullough's Sons

- SELECTION OF -

NOVELTIES AND SPECIALTIES

Vegetable, Flower Seeds and Plants.

In this selection we offer only those varieties that we feel assured will give perfect satisfaction, both in appearance and quality in the home garden, while commanding highest prices for market purposes.

Norwood Giant Stringless Green Pod Bean.

This valuable new variety has proven to be far superior to any other green-podded bean grown, and will be highly appreciated by all who grow for market, also by those who grow for their own use. It is positively stringless, and ripens fully a week earlier than the well-known Red Speckled Valentine bean, which has been the favorite market sort for many years. The pods, which are produced in abundance on the vines, are long and very fleshy, perfectly round and very meaty; the color is a beautiful shade of pale green. The pods remain tender and crisp much longer after maturity than any other variety known, and the quality is the very finest. Too much cannot be said in favor of this most excellent bean, which will fast forge its way into popularity among the growers.

Per pkt., 5c; pint, 15c; quart, 30c; peck, \$2.00.

Round Pod Wax Bean.

This is a novelty in the true sense. Has never been known to rust. This is singular, as most all Wax-Podded beans will do so at times. It is tender, delicious and almost stringless. Pods of a rich golden color, often seven inches in length. Don't fail to try it. Per pkt., 5c; pint, 20c; per quart, 35c; per peck, \$2.25.

Columbia Beet.

One of the finest main-crop Beets either for market or the home garden. One of the finest main-crop Beets either for market or the home garden. The roots are of neat turnip shape, growing three to four inches in diameter, deep through, but quickly tapering in the lower portion; smooth and entirely free from small rootlets. Flesh deep blood-red, tender, and of rich flavor. The roots can be used early in the season when only partially grown, being ready for use almost as quickly as the Extra Early sorts, and of finer quality. It retains its fine quality and freedom from woodiness until the beets have reached their full size. Foliage is comparatively small, of a rich bronze color. Per pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c.

Detroit Dark Red Turnip Beet

One of the best deep red turnip beets, not only for market gardeners, but one of the best deep red turnip beets, not only for market gardeners, but for the home garden. Its small upright growing tops, early maturing, and the splendid shape and color of the roots, make it popular with every one who plants it. Color of skin dark blood-red; flesh bright red, zoned with a lighter snade, very crisp, tender and sweet, and remaining so for a long time.

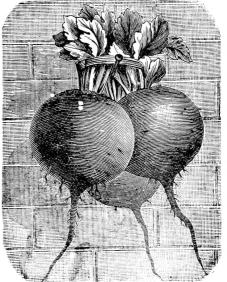

5c pkt., 10c oz., 25c ¼ lb., 75c lb.

Improved Rubicon Carrot.

grower. It is the result of careful breeding, and in shape and color most desirable. The Carrots grow about same length as the well-known Danvers, but thicker, and are a rich dark orange in color. It is an enormous cropper and a

Early Sheffield Sugar Corn.

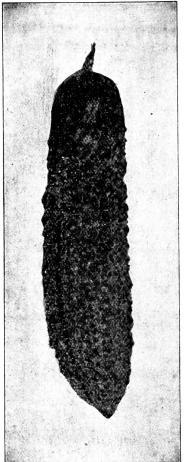

This new extra early variety is the result of a cross between the Cory and

Columbia Beet.

Extra Early Adams. It combines not only the merits of these two leading early varieties, but is really superior to either. The "SHEFFIELD" can be planted fully as early as the Adams, as the young plants will withstand slight frosts. The stalks are strong and vigorous, growing about five feet in height, bearing one or two fine ears to a stalk. The ears are quite large for so early a variety, and are entirely free from smut, which destroys so many ears of the early planted sweet corns. The grains are of medium size, arranged in ten or twelve regular rows, well filled to each end of the ear; juicy and of a fine sweet flavor, if gathered at the proper stage. For an early garden variety, or to plant early for market, "SHEFFIELD" is a distinct acquisition, both on account of its hardiness and freedom from "smut," as well as for its attractive appearance5c pkt., 10c pint, 20c quart, \$1.00 peck.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by mail, postage must oe added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

The Cumberland.

CELERY. to stay.

CUMBERLAND CUCUMBER.

The Best Cucumber Known.

Variety of the hardy, white spine type, is a rapid, strong and vigorous grower and very prolific in fruit. The pickles differ from all other hardy sorts in being thickly set with fine spines over the entire surface, except the extreme stem-end; and during the whole period of growth, from the time they first set until fully grown, the form is exceptionally straight and symmetrical, thus being as choice as a slicing variety as it is for pickles. The flesh is firm but very crisp and tender at all stages. We offer it in full confidence that it will please our customers in every particular, and honestly believe to be the best pickling cucumber ever pro-

Many Heart. This is one of the best keeping Celeries in the market today, and having plenty of heart, which is the important factor of today. It sells well, also the delicious flavor besides being very brittle makes it very desirable. Without doubt it is here

Pkt., 5c; oz., 30c; ¼ lb., 85c.

Shumacher. This is the finest dwarf winter celery we have ever grown, being quite similar to the Golden Self-Blanching, but of a rich green coloring like the Giant Pascal. It is more readily blanched than the latter and ready for use or market much earlier in the

fall. The plants m a k e large bunches of extra

Paris Golden Yellow.

stalks with a very large heart; the stalks are all of even length, and it makes the most handsome appearance of any variety when bunched. The stalks are very fine in flavor, of best table quality, and are of a rich golden yellow when blanched.

Per pkt., 5c; oz., 20c; 1/4 lb., 60c.

McCullough's Paris Golden Yellow. The best Celery for early use. Its rich, golden, yellow color, close habit and compact growth, and greater than all, the readiness with which it is bleached and rendered marketable, makes it invaluable to the gardener and exceedingly popular with every planter. The en-

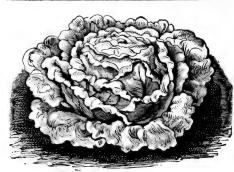

Early Spring Cabbage.

Fully as early as the Jersey Wakefield, but the heads are of the round, flat type of early summer. It has very few, small outer leaves, thus allowing it being planted as close as any variety known and producing the largest number of heads per acre. Stem short and heart very small, making almost entire head fit for use. The

Early Spring Cabbage. quality is extremely fine, veins small, and not the least signs of coarseness. A great point in its favor is the fact that the heads

harden at an early stage of growth, so that they are really fit for use before fully matured. Per pkt., 5c; per oz., 25c; per 1/4 lb., 75c; per 1b., \$2.50.

LETTUCE.

Norwood Lettuce. One of the best for forcing; extensively grown in this market by market gardeners; early and productive. A loose leaved variety......5c pkt., 10c oz., 20c ¼ lb., 75c lb.

Grand Rapids. As a lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list, being of quick growth, little liable to rot and standing for some days after being fit to cut. The plant is upright, and forms a loose head or cluster of large, light yellowish-green leaves, slightly crimped and blistered and rather thin, which will stand shipping long distances better than most sorts.

5c pkt., 15c oz., 40c 1/4 lb., \$1.00 lb. Yellow-Seeded Butter. A distinct sort, making a compact yellow head, of excellent flavor, withstands heat well and remains crisp and tender. 5c pkt., 15c oz., 40c 1/4 lb., \$1.00 lb.

Yellow-Seeded Butter Lettuce.

MUSK MELON.

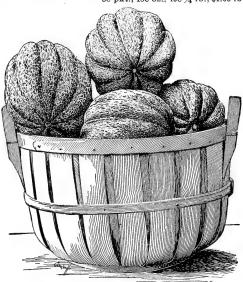

Paul Rose Musk Melon. Cross between the old Netted Gem and Miller's Cream, and combines in a remarkable degree the good qualities of both. The fruit grows very uniformly, and of an attractive and useful size for packing. It is a very heavy cropper, the vines are very healthy and robust, ripening an enormous number of fruits. The flesh is salmon colored, very deep and of fine melting character with thin tough rind and small seed cavity. The flavor is excellent, very sweet and rich.

5c pkt., 10c oz., 25c 1/4 lb., 75c lb.

Tip Top Musk Melon. A yellow-fleshed melon of the very best quality, every melon produced, big or little, early or late in the season, is a good one. They are sweet, juicy, of finest flavor, eatable to the very rind. It is a strong grower and heavy yielder, and

WATER MELON.

Kleckley's Sweet Water Melon. Vines strong and vigorous and the fruits grow uniformly to quite a large size; oblong in form, rather tapering at the ends. The skin is a rich dark green, while the flesh is bright scarlet, ripening close to the skin, the rind being only about one-half inch in thickness. The rich, bright scarlet flesh is crisp, sugary and melting to the highest degree, being entirely free from any stringiness. The rich coloring of the flesh together with

Tip Top Musk Melon.

its luscious sweetness combine to make it one of the finest table melons.......5c pkt., 10c oz., 25c 1/2 lb., 75c lb.

Hoosier King.

Hoosier King Water Melon. A large variety, oblong shape, with skin striped light and dark green. The flesh is brilliant red, very solid, sweet and luscious; the rind is thin but tough, making it a good variety for shipping. The beautiful markings together with its desirable shape, make it an attractive and salable melon....5c pkt., 10c oz., 20c 1/4lb., 60c lb.

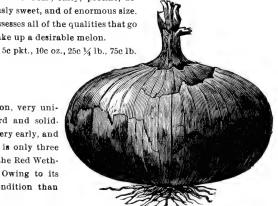

Triumph Water Melon. A cross between Duke Jones and Kolb's Gem. It has the handsome appearance of the former and the shipping quali-

ties of the Gem; early, prolific, deliciously sweet, and of enormous size. It possesses all of the qualities that go to make up a desirable melon.

ONION.

Australian Brown Onion. Is a most attractive market onion, very uniform and a fine appearance, being medium size, very hard and solid. The illustration was made from the natural onion. It is very early, and never makes any stiff necks on scullions. When the plant is only three inches high, the bulb begins to form. Much earlier than the Red Wethersfield and ripening so uniform, it will make its mark. Owing to its firmness and hardiness, it should keep longer in good condition than any other onion. . The color is a clear amber-brown,

Pkt., 5c; oz., 15c; 1/4 lb., 40c; per lb., \$1.25.

Australian Brown Onion.

PEAS.

RADISH.

McCullough's Cincinnati Market. Original Strain Radish. The radish so much grown by the Cincinnati market gardeners, and is the handsomest long radish in cultivation. It is a beau-tiful glossy scarlet, with a very small long radish in cultivation. It is a deautiful glossy scarlet, with a very small top, and grows from six to seven inches long. The skin is very thin, and the flesh crisp and brittle and of a delightful pungent quality. It is undoubtedly the finest long red Radish for forcing, and will outsell any other on the market, and it is also an extra fine sort for the home garden, the quality being unexcelled. Our original stock of Cincinnati Market Radish was grown by the introducer. We purchased his entire crop, only a limited quantity. Purchasers desiring the best long Red Radish should send in their orders early.

5c pkt., 10c oz., 25c 1/4 lb., 90c lb. Cardinal Globe Radish. This radish grows globular in shape, and is a brilliant cardinal color. It stands the heat well and therefore is a good forcer. The quality is fine, being crisp and tender on to the veroed ferring Radish but

The quality is fine, being crisp and tender; not only a good forcing Radish but does well in open ground.
5c pkt., 10c oz., 30c ¼ lb., 75c lb.

TOMATO.

Atlantic Prize Tomato. One of the earliest varieties, comes in advance of such standard kinds as Acme, Beauty, etc. It bears in clusters, is of good size, smooth, round; color, scarlet. 5c pkt., 20c oz., 60c ¼ lb.

Buckeye State Tomato. The tomatoes are borne in immense clusters of four to eight large fruits. In time of ripening, it matures with the "Stone." In solidity and-meatiness, it has no equal, while in luscious quality none surpass it. The color is much the same as "Beauty," but of a somewhat darker and richer shade, and this together with its very large size and clear-gut outlines makes it very shawe and striking when displayed for

guus Tomato. A distinct new variety, color, r.ch., glossy crimson, with a slight purple tinge. It is thicker, heavier and more solid than either Acme or Beauty. It is unsurpassed in quality, and in the production of fine, large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market. The form is perfect, uniform large and attractive. Flesh is very firm. It is a robust grower, with what it will take the production of the pro Magnus Tomato. short joints, setting its fruit clusters closer together than most varieties, and is therefore a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe shaped. It ripens evenly, does not crack about the stem, and the flavor is most desirable.

crack about the stem, and the havor is most desirable.

5c pkt., 30c oz., \$1.00 ½ lb.

ne Tomato. A fine variety. The fruit very large, brightscarlet; smooth, ripening evenly to the stem without a crack. Exceedingly solid and firmfleshed, and, above all, not subject to rot...5e pkt., 20c oz., 50c ½ lb., \$2.00 lb.

fleshed, and, above all, not subject to rot...5c pkt., 20c oz., 60c 1/41b., \$2.00 lb.

Trucker's Favorite Tomato. One of the finest large-fruited purple sort. The plants are of strong growth and productive. The tomatoes are of large size, deep through, very smooth and regular, free from cracks. solidly menty, with small seed cells and fine flavor. Though such a productive variety it ripens a large number of fruits early in the season. A good maincrop variety either for home use or for market...5c pkt., 40c oz., \$1.25 1/4 lb.

Strawberry, or Winter Cherry (Husk Tomato). Plants of low, spreading growth and immensely productive. The small yellow fruits are each enclosed in a husk or covering. When ripe the fruits are half an inch in diameter, bright yellow, and of very sweet flavor, highly esteemed for preserving or making pies. They are also excellent to eat raw as fruit.

5c pkt. 25c oz.

5c pkt., 25c oz.

Magnus Tomato.

Pansy Masterpiece.

Salvia Splendens Silver Spot.—The leaves are rich dark green, with light sulphur or cream-colored spots of various size liberally sprinkled overthem. The unique and elegant foliage is very abundant and has an extremely fresh and healthy appearance. The intense bright scarlet flowers are very large and the plants of neat compact habit. A charming variety of great effect. 15c pkt, 2 pkts. 25c

Hunnemannia Fumariaefolia. — Most showy, erect, freebranching plants eight inches in height, with finely cut gray-green foliage: large, single, tulip-like flowers of a rich glowing yellow, borne single on a long stiff stem. Seed should be planted in shallow drills early in the spring when the trees are starting out in leaf. Per pkt. 5c.

Star Petunias

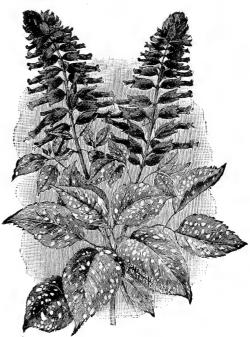

Flower Seed Novelties and Specialties.

Pansy Masterpiece.—A remarkable new type which will, without doubt, be warmly welcomed by the numerous lovers of this beautiful class of plants. The chief difference from other strains consists in the form of the flowers, the border of each petal being conspicuously curled or waved, giving the flower a double or globular appearance. The large size of the flowers and the extraordinary free flowering qualities of the plant make them valuable for bedding purposes. Another feature of this marvelous strain is that it produces some tints of color not found in any other Pansy.

25c pkt.

Pansy, McCullough's Premier.—This new strain is saved from the finest flowers of one of the best collection of Pansies in the world. The plants are compact and of robust growth, and if cultivated properly will give an abundance of very large flowers of unsurpassed brilliancy of color and distinct markings. Florists and amateurs desiring charming "show" flowers should not neglect this strain, as it is the result of many years careful selection and hybridization, and embraces all the attractive features that tend to make the Pansy the people's flower.

%oz. \$1.00; pkt. 25c.

Salvia Splendens "Silverspot."

Star Petunias.—The difference from other petunias is the blossoms, which are marked with a star in the center. This star, from which the name is taken, varies in size. Rays of crimson often run through the star and line the edge. In some of the flowers, these crimson markings give it a feathery appearance. The color may be called a purple crimson, but it has a velvety depth and richness which cannot be described.

The plant is dwarf 18 inches to 2 feet, more delicate than the original type, a free bloomer, bearing over 100 blooms to a plant, while as many as 180 have been counted on a single specimen at one time. The blossoms are of good substance of petal and of the velvety appearance of pansies.

Small packets, 15c each; 2 pkts. 25c. Large packets, 25c each; 5 pkts. \$1.00

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-Pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by Mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

Flower Seed Novelties and Specialties—continued.

Dolichos Daylight. This grand climber is desirable both for its beautiful flowers and dense growth of foliage. The vines quickly grow to a height of eight to ten feet, and blossom profusely from base to summit, the large spikes of pure white flowers standing out boldly from the rich green foliage. As the flowers drop from the long spikes they are succeeded by broad, velvety, showy white pods which retain their purity and freshness of color a long time before drying up. It is not only a most effective vine for training on poles or as a screen for the porch, but is equally as attractive where the vines are allowed to run at will over a pile of rough stones or brush, or even prostrate on the ground, the beautiful spikes of flowers and pods standing stiffly erect above the mass of foliage when grown in this manner......Packet, 5c.

McCullough's Special Lawn Grass Mixtures.

McCullough's Suburban Lawn Grass Seed. Is a mixture of the finest Dwarf Evergreen Grasses, which will produce a sward of that dark green color so much admired. Our mixture is the result of

years' experimenting, and as we now offer it, it is unequaled.

It is now a decided fact that Seed will make a better lawn than turf or sod. The best soil is a good medium texture; the surface should be raked repeatedly, thoroughly pulverized and smoothed to the desired grade; remove all large stones, roots and hardened pieces of earth that cannot be readily broken. When the soil is firm, level and suitably moist, sow our "Suburban" Lawn Grass seed at the rate of 4 to 5 bushels (64 to 80 lbs.) per acre. One pound is sufficient to sow a small yard 15 x 20 feet, or 300 square feet. It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then rake lightly and give a thorough rolling or pat well with the back of a spade. The seed must be well firmed in the soil. To preserve a lawn in good condition, an annual dressing of Suburban Lawn Fertilizer (500 to 600 lbs. to the acre) should be used.

Renovating Lawns. When your lawn has already been established, you will find it to your advantage to lightly re-seed. Carefully rake off all dead leaves, etc., and sow our "Suburban" LAWN GRASS SEED at the rate of two bushels (32 lbs.) to the acre; roll thoroughly, or pat well with the back

f a spade

Price: ½ 1b., 15c; 1 lb., 25c; 5 lbs., \$1.00; 1 bu. of 16 lbs., \$3.00. If wanted by mail, add 10c per lb. extra.

McCullough's Lawn Grass for Shady Places. On nearly all lawns there are shaded bare and unsightly spots on which the owners have difficulty in getting a stand of grass; for such places this mixture is adapted. It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour" or drainage defective, it is apt to be covered with moss. If such is the case apply some lime or land plaster to sweeten it, but the moss should first be removed by the use of a sharp rake, then sow the seed at the rate of 4 bushels (64 lbs.) per acre.

Price: 1 lb., 40c; 5 lbs., \$1.50; 1 bu. of 16 lbs., \$4.50. By mail, 10c per lb. extra.

McCullough's Terrace Mixture. There is nothing more annoying than to have ground washed out. In this mixture we have put quick growing and deep-rooted grasses. Of course it depends a great deal on

this being well started before a wash-out.

Per 1b., 30c; 5 lbs., \$1.40; 1 bu. of 16 lbs., \$4.00. By mail, 10c per lb. extra.

McCullough's Golf Link Grass Seed. We have given much attention to grasses for Golf Links.

The mixtures we offer below are composed of such varieties as will thrive here, and are the result of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on the Golf Links.

We have always on hand all the natural grasses of Europe and America, and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the **requirements** of the Links may be for poor land or rich, high and dry, or low and wet.

PUTTING GREEN MIXTURE. A mixture of extra fine grasses that will make a close, firm, green

and lasting turf which will improve the more it is tramped on.

Per 1b., 30c; 5 lbs., \$1.40; 1 bu. of 16 lbs., \$4.00. By mail, 10c per 1b. extra.

GOLF LINK MIXTURE. For the grounds in general.

Per 1b., 20c; 5 lbs., 80c; 1 bu. of 16 lbs., \$2.25. By mail, 10c per 1b. extra.

Maman Cochet.

CALIFORNIA PRIVET (Ligustrum Ovalifolium). of California Privet is a fence of beauty, needs little care and is very hardy. Can be trimmed to any desired shape. It is much cheaper than any fence that could be put up. Dust or smoke has no effect on it. Unlike artificial fencing, the older it grows the more beautiful it becomes, therefore the expense is less. Insects never attack it. The wax-like beautiful foliages are straight in the form of the country of the countr age retains its freshness long enough to have a claim to being evergreen.

Directions for Planting. Privet may be planted in Spring, from March to May, and in Autumn from October to December. A single-row hedge requires 150 plants to each 100 feet, a double-row hedge, 200 plants to each 100 feet. We much prefer a double-row hedge, and if such is desired, the trench should be wider and the plants set alternately at twelve

ROSES.

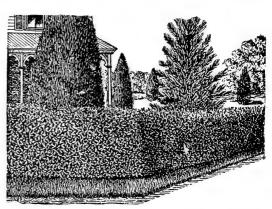

adame Abel Chatenay. A fine bedding Rose, as it is a profuse and continuous bloomer. Flowers large and full, petals recurved and of a beautiful rose, shaded with rose vermilion and tinged with salmon. The base of the petals is highly colored. This will undoubtedly make a tine garden Rose because of its substance and hardiness. The flowers are borne on long stems so that it is and hardiness. The flowers are borne on long stems so that it is exceedingly well adapted for vases of cut flowers.

25c each, \$2.75 doz.

Maman Cochet. One of the best new Roses. The growth is vigorous, with rich, healthy foliage. The extra large flowers are produced on long stems, are very double, and the buds and half expanded flowers are simply exquisite in their graceful form, delicate color and rich fragrance. The color is deep rose pink.........25c each. \$2.75 doz.

Maman Cochet White. The flowers are of enormous size, remark-

Dorothy Perkins. A new, shell-pink Climbing Rose. is of the same strong habit of growth as Crimson Rambler, and the flowers are borne in clusters of 30 to 40. The flowers are large for a rose of this class, very double, sweetly scented and of a beautiful shell pink. A great acquisition, good forcer and free flowerer; absolutely hardy......35c each, \$3.50 doz.

should be wider and the plants set alternately at twelve inches apart, forming in a remarkably short time a perfect and thick hedge. Do not put manure in the trench in contact with the roots. After the plants are set, long stable manure may be applied on top, which will answer as a mulch during dry weather, while stimulating a vigorous growth. Pruning may be done at any season of the year, and without the slightest injury to the plants. Constant pruning stimulates a strong compact growth, and a perfect, low branched hedge may be had the second season after planting. We have a fine stock of strong, healthy, well-rooted plants.

Large Plants, 75c doz., \$4.00 per 100. Extra Large Plants, \$1.00 doz., \$6.00 per 100.

Fern Ball in Leaf.

JAPANESE FERN BALLS. Is composed of Japanese Island Fern Roots and Sphagnum Moss, and so constructed as to send out leaves beautiful dark green from every point. They are easy to take care of, and if let dry out about every three months and allowed to rest awhile, they will last indefinitely.

Don't fail to order some, as from the satisfaction they have given the demand is beyond the supply.

Directions. Place the ball in water for one hour, and then hang in a desirable position, in two days dip again for fifteen minutes, and repeat every two days till the growth is started, after which only dip twice a week for five minutes at a time. Order now and make sure of them.

Large Size Dormant......75c; by Mail, 95c. Small " "50c; " 65c. Large " In Leaf, \$1.25; by Express, not prepaid.

JAPAN MAPLE. One of the most beautiful ornamental trees or shrubs in beauty and coloring, unsurpassed by any. For grouping in landscape gardening are invaluable and unrivaled.

Strong plants, with finely cut bright scarlet leaves......\$1.25 each.

...THE...

CYPHERS INCUBATORS AND BROODERS.

If you are in search of the latest patented, most durably built and best practical incubator manufactured to date, the one that will hatch "the largest number of the strongest and healthiest chicks or ducklings," the Cyphers is that machine.

THE CYPHERS INDOOR, OUTDOOR AND SECTIONAL BROODERS.

The Cyphers Brooders, like the Cyphers Incubators, are as correct in principle and as durably made as we know how to make them. They are Mr. Cyphers' own invention, have been in use three and four years, have been altered slightly from time to time as experience suggested, until today they are practically perfect. The proper test is the actual work they do in the hands of men and women engaged in raising poultry by artificial means. Hundreds of Cyphers Brooders of the different styles and sizes have been sold, and scores of people, both men and women, have reported their success with them under all conditions.

ARTICHOKE.

Sow in April in rich soil, and transplant the following spring to permanent beds, in rows or hills, three feet apart and two feet between plants.

ASPARAGUS (Spargal, Ger.)

One Ounce will Produce 200 Plants. Five Pounds to the Acre.

N EARLY spring sow the seed, after soaking it twenty-four hours in warm water, in drills about one foot apart and one inch deep. The soil should be very rich and well worked. Later, thin plants to three or four inches apart in the rows, and cultivate often and thoroughly through the summer. The permanent beds should be prepared by deep plowing or spading, and thoroughly enriching the ground with stable manure or other fertilizers. If the subsoil is not naturally loose and friable, it should be made so by thoroughly stirring with a subsoil plow or spade. Make rows three feet apart and four inches deep, and set the plants in the bottom of the rows eighteen inches apart. Cover the roots about two inches deep. After the plants are well started, give frequent and thorough cultivation, and draw a little earth into the furrows at each hoeing until they are filled. Early the next spring, spade in a heavy dressing of manure, and one quart of salt to each square rod, and cultivate well until the plants begin to die down. The next senson the bed may be cut over two or three times but if this is done all the short shoots, no matter how small, should be cut, and after the final cutting, give a good dressing of manure, ashes and salt. In the fall, as soon as the tops are ripe and yellow, they should be cut and burned. The plants may also be set in the fall, if the ground is so well drained that water will not stand on it. The quickest way to obtain a supply is to plant the roots. Two-year-old roots will insure the best and earliest results.

BEANS (Bohne, Ger.)—Dwarf or Bush.

Dwarf Green Podded Sorts.

One quart will plant one hundred feet of drill.

HE varieties of this class are tender, and will not bear much cold. Plant about the middle of April, if the ground is warm and the season favorable, and at intervals throughout the season for a succession, finishing about the 15th of August. The best mode of culture is in rows two feet apart, and the beans three inches apart and two inches deep in the rows. Keep well hoed, and draw the earth up to the stems, but only when dry; working them wet with rain or dew will cause them to rust and injure the crop.

BEET. (Rothe Rube, Ger.)

One Ounce Will Sow Fifty Feet of Drill. Eight to Ten Pounds for an Acre.

HE soil which is best suited is that which is rather light and thoroughly enriched with manure. For an early supply sow in spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop, sow the first week in May, and for winter use, sow in June. When the plants have attained three or four leaves, thin out so they may stand five or six inches apart. Keep free from weeds by hand-weeding or hoeing. In October roots may be taken up and stored in the cellar, or in pits outside, like potatoes, care being taken that they are not bruised or injured in the

In the fall Are used as greens, very tender when touched by frost. the leaves should be broken down so that the little cabbages will have room to grow. Dwarf Improved 05 25

CABBAGE (Weisskopf Kohl, Ger.)

One ounce will produce 1,500 plants. Quantity to transplant one acre, one-half lb.

HE early varieties of Cabbage are cultivated more extensively than any other vegetable. In lavitudes where the thermometer never indicates 20° below the freezing point, seed may be sown in the open border in October, and planted out on the first opening of spring; but in the Northern States they must either be sown in hotbeds in February, or, what is still better, wintered over in cold-frames; for this purpose, the seed is sown beds in February, or, what is still better, wintered over in cold-frames; for this purpose, the seed is sown from the 10th to the 20th of September. Attention to date is important; if too soon the plants might run to seed, and if too late they would be too small. In four or five weeks from the time of sowing they will be fit to transplant into the cold-frames. In planting, it is very important with Cabbage or Cauliflower, that the plant is set down to the first leaf, so that the stem is all under ground, for, if exposed, it will be split by the action of the frost, and will be injured in consequence. The plants are usually set out from the middle of March to the middle of April, in rows about two feet apart and eighteen inches between the plants in rows. The earliest crop matures in June. For second early, the early kinds should be sown first week in April, and planted out in May. The crop should mature in July and August. The late varieties are usually sown in the early part of May, and the plants are set in July, at a distance of three feet between the rows, and two feet between the plants. This crop matures september, October, or November. Cabbage should not follow cabbage successively. The late plants are subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To preserve the plants, sprinkle them with wood ashes, air-slacked lime, plaster, slug-shot or tobacco dust, early in the morning while the plants are wet with dew.

Our Seed is grown from selected heads, and saved from center shoots.

McCULLOUGH'S LOUISVILLE DRUM-HEAD

Originated in this market and is now the principal market variety all through this part of the country. It is highly esteemed by the market gardeners, and it will stand hot weather better than other sorts; will stand the entire summer without bursting. Our Louisville forms large, solid heads, and is the earliest large heading variety; while, if planted later, it makes excellent heads for winter. The quality is very fine and it is remarkable for its certainty to head. For winter use sow

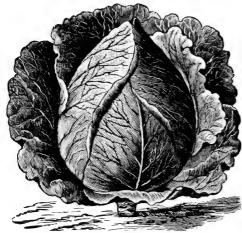

later in the season. We have received expressions of unanimous praise from all parts of

Pkt. Oz. 1/4 lb. Lb.

Intermediate.

CAULIFLOWER.—(Blumenkohl, Ger.)

McCullough's Earliest Dwarf Erfurt Cauliflower.

OUR SPECIALTY.

One Ounce of Seed for 1000 Plants.

OW for early use about the middle of September or October, in a bed of clean, rich earth. Transplant in frames and cover with sashes and shutters during severe weather, giving them light and air every mild day. When this is not practicable, they may be had nearly as well by sowing the seed in a hot-bed in January or February, and when the plants are large enough transplant three inches apart in boxes, or in other hot bed, until time to plant out. If hardened off, they are seldom injured by planting out as early as the ground can be properly prepared, 2½ feet apart each way. Keep them well hoed, and bring the earth gradually up to their stems, watering freely in dry weather, and especially when they begin to head. The Cauliflower succeeds best weather, and especially when they begin to head. The Caulifower succeeds best when planted in frames at the close of winter and brought to maturity before the summer heat sets in. The late va-rieties mature in the autumn, and are sown and managed similar to winter Cabbage.

Special Prices given to Market Gar-deners and others who use large quantities of Seed.

2.00

Longfellow. A popular and well-known, yellow, eight-rowed Flint variety. Ears from ten to twelve inches in length. Very early and an abundant yielder......50c peck, \$1.50 bu.

bushels per acre......60c peck, \$2 00 bu.

CUCUMBERS. (Gurken, Ger.)

One Ounce of Seed for Fifty Hills.
Two Pounds for an Acre.

OR early use sow in hot-houses on small sods over-turned, or in small pots plunged in earth. As soon as danger from frost is over transplant with sod, so as not to disturb the plants, into hills in the open ground. Forgeneral crop sow from about the first to the middle of May in rich, mellow, warm soil. Use a shovelful of well-rotted manure in each hill, and cover it two inches deep with fine earth. On this sow the seed, about eight or ten seeds to a hill; cover one-half inch with earth and press down. When danger from bugs is past, thin out to four plants to a hill. For pickles, plant from June to middle of July. Always pick the fruit when ready, even if not needed, otherwise the productiveness of the vine is destroyed.

Green Curled Endive.

EGG PLANT

(Eierpflanze, Ger.) '

One ounce will produce about 1,000 plants.

VERY tender plant, the seed requires the strongest heat. Sow in a hotbed early in spring, when the plants are two inches high, transplant. Plant out when the weather becomes settled and warm. Give them a deep, rich soil; full exposure to the sun. When they germinate they are sensitive to damp and being chilled, the amateur often fails to raise them, even with his own hotbed. To obviate this we will have a supply of strong potted plants from the middle of May to the first of July.

New York Improved.

Pkt. Oz. 1/4 lb. Lb.

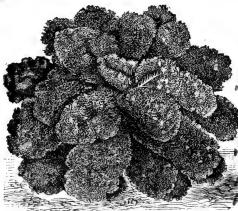

New York Improved. This is the leading market variety everywhere. Plant is robust, the leaves and stems

ENDIVE. (Endivien, Ger.)

NE of the best and most wholesome salads for fall and winter use. Sow in shallow drills in April for early use, or for late use in June or July. When two or three inches high transplant into good ground, or thin out to one foot apart. When nearly full grown, they must be blanched. This is done by gathering the leaves together, and tying with yarn or bass, to exclude the light and air from the inner leaves, which must be done when quite dry, or they will rot. Pkt. Oz. 141b. Lb. 15 1.70

KOHL=RABI. (Turnip Rooted Cabbage.) One ounce of Seed for 1,500 plants.

For an early crop, start in a hot bed and treat the same as early Cabbage. For winter use, sow the middle of June. Pkt. Oz. 1/41b. Lb ... 05 20 70 2.25

Norwood Kale.

Kale or Borecole.

(Blaetter-Kohl, Ger.) One Ounce to 100 Yards of Drill.

HE Kales are more hardy than Cabbage, and make excellent greens for winter and spring use, and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early spring use, sow in September, and protect during the winter.

LETTUCE—(Lattich oder Garten Salat, Ger.)

One Ounce will Sow 150 Feet of Drill.

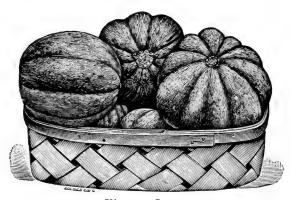

ETTUCE thrives best in rich, moist ground. For the principal early crop, sow the seed in September in the open ground; transplant, when large enough, into cold frame's, and protect the plants during the winter in the same manner as early Cabbage; set the plants out early in April, or sow the seed in hotbeds in February or March, and transplant into a sheltering border with a southern exposure. For successive crops, sowing may be made in the open ground as early as the spring opens, and continuing until July. Always thin out well, or the plants will not be strong. When wanted as a cut salad, sow the seed thickly in rows or broadcast.

McCullough's Nonpareil.

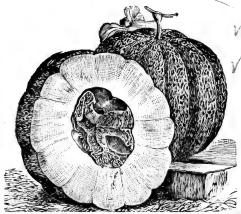

HEAD

HEAD VARIETIES.	114	o`	3 /13	T 1
McCullough's Selected Nonpareil. The finest market variety to be found. Its beautiful yellowish-green color, crimped, curled, and well-formed heads, tender quality and sweet flavor, place it at the head of the list for the market gardener or for family use. It withstands the heat of summer and retains its sweetness for a longer time than any other variety we know				1.00
Big Boston. Resembles the popular Boston Market, but is nearly twice as large; desirable for forcing in frames and for spring and fall outdoor planting	05	20	50	1.25
Boston Market. This is an improved variety of the Tennis Ball, and attains a large size. It grows very compact, is white and crisp, and is one of the very best varieties for forcing	05	15	35	1.00
Brown Dutch. A dark, brown-spotted variety, remarkable for its hardiness. The inner leaves are beautifully blanched, and very sweet and tender	05	15	35	1.00
Yellow Seeded Butter. See specialties Be sure and try it	05	15	40	1.00
Defiance Summer. A large-growing cabbage Lettuce, unexcelled as a long-standing sort. The leaves are of light green color, and it remains for a long season tender and crisp.	05	15	40	1.00
Denver Market. This Lettuce is highly recommended, either for forcing or open ground; forms large solid heads of a light green color; is slow to seed. The leaves are curled and crimped, very crisp and tender	0á	15	40	1.00
Hanson. Heads green, with white heart. Large size, crisp and tender	05	15	40	1.00
Salamander. One of the best for summer use, forming good-sized, compact heads. Color, light green outside, and white inside	0.5	15	40	1.(0
Silver Ball. This is one of the best all-the-year-round Lettuce. It is an excellent variety, as well for early spring and summer use as for winter forcing. The heads are silvery white, very firm and compact	05	15	40	1.00
Tennis Ball, Black Seeded. A favorite forcing variety, forming a large head. It makes but few outer leaves, and for this reason can be planted quite closely under glass	05	15	35	1.00
Pennis Ball, White Seeded. The sort so extensively grown for forcing and heading under glass; good size, firm heads and very white and crisp	().5	15	35	1,00
CURLED VARIETIES.				
Norwood. One of the best loose leaved early market varieties, consequently very profitable for market gardeners. It makes a good show; light, creamy white leaf. Very tender when grown early	05	15	35	1.00
Black Seeded Simpson. One of the most popular sort. It forms large, loose leaves of ideal color; the leaves are large, thin, yery tender, and of very good quality. It is one of the best sorts for use under glass as well as for early outdoor planting. Our seed of this has been most carefully selected, and we sell large quantities to market gardeners.	0.5	15	10	1.00
Early Curled Simpson. Does not head, but forms a close, compact mass of leaves; very early, excellent for forcing	05	15	35	1.00
Grand Rapids. As a Lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list, being of quick growth, little liable to rot and standing for some days after being fit to cut. The plant is upright, and forms a loose head or cluster of large, light yellowish-green leaves, slightly crimped and blistered and rather thin, which will stand shipping long distances better than most sorts.				
Early Curled Silesian. Early, loose heads, curled, tender and fine flavor	05	15.	35	1.00
Oak Leaved. Very distinct, excellent for summer use and for growing in the South, as it resists the greatest	05	15	40	1.00
Paris White Cos. Tender and crisp. One of the best varieties for blanching.				
Prianon Cos. A self-blanching Cos Lettuce, very crisp and tender, and of excellent flavor. The leaves when bleached are stiff like celery stalks, and can be eaten in the same manner.				

Kinsman Oueen.

Pkt. Oz. ¼lb. Lb Kinsman Queen. Ten days earlier than any Musk Melon. Large size; nearly round in shape. Its beautiful, buff skin is covered with a very thin whitish netting; flesh, green, very solid 60 and thick...... 05 Vasaba. Oval shape, sweet and delicious 05 60 Early Netted Gem. Very early, small, coarsely netted green flesh, fine flavored...... 05 10 60

Extra Early Hackensack.

MELON-Musk.

(Zucker Melone, Ger.)

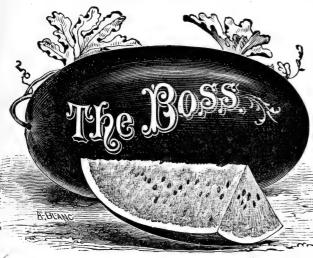

One Ounce will Plant about Sixty Hills. Two to Three Pounds in Hills per Acre.

N SELECTING a patch for Melons, be careful to have it at a safe distance from your Squashes, Cucumbers, Pumpkins, etc., or they will certainly mix. In preparing the hills fork in plenty of manure, and about the middle of May, when the ground is warm, plant in each hill eight or ten seeds, and cover half an inch deep. After the danger from bugs is over, pull all but three or four of the strongest plants. As soon as the vines have run sufficiently and spread their branches, stop them by pinching the top off the first running bud. This will strengthen the plants, and promote their perfecting fruit early. The ground should be kept free from weeds and frequently cultivated.

MUSHROOM SPAWN. (Champignon Brut, Ger.)

If ordered by mail, add ten cents per pound for postage.

Mushrooms.

CULTIVATE mushrooms successfully does not always require extensive experience. Some care is necessary, however, in the selection of materials, and in forming the beds; but the matter of securing and maintaining the proper temperature in the room and in the beds needs close attention, for success depends very much upon this point. Mushrooms may be grown in a great variety of situations—a dark room, cellar, stable or elsewhere. Any place in which an even temperature of about 50° to 60° can be kept is suitable. For material for the bed, use fresh horse manure, free from straw or chips, and good loamy soil. Some growers use the manure unmixed with loam, after first having well fermented it by alternately piling up and mixing for a few weeks; butitis undoubtedly better not to allow the manure to heat much before forming a bed. Use one-fourth to one-third loam, the rest much before forming a bed. Use one-fourth to one-third loam, the rest manure. Mix very thoroughly; and upon a dry, firm bottom make the bed of this mixture, about four feet wide and of any desired length. Build it up evenly, press it down very firmly, and leave it about a foot high. It will shortly begin to heat. Use a thermometer to thrust into the bed and note the temperato heat. Use a thermometer to thrustinto the bed and note the temperature. When the heat has partially subsided, leaving a temperature of 80; put in the spawn. Pieces from the size of walnuts to that of eggs are placed in the bed about a foot apart, deep enough to cover them well, and the and the bed about a foot apart, deep enough to cover them well, and the namure pressed down. Let it remain thus ten or twelve days, then cover with two inches of fresh loam, and make this moderately firm. The bed is finished by covering all with four or five inches of straw or other litter. Watering is not necessary, unless the surface of the bed gets very dry; in this event moisten freely with water at a temperature of about 90°. In gathering the crop, do not cut, but twist them off carefully, filling up the holes with loam to keep insects from the roots. In six or eight weeks from spawning the beds, mushrooms should appear.

Our Celebrated English Milltrack Mushroom Spawn (made by the best maker in England especially for our trade) has gained an enviable reputation among critical growers for its uniform good quality and can be thoroughly relied on to produce a good crop of the best mushrooms. 15c per lb.; \$1.00 for 10 lbs.; \$9.00 per 100 lbs.

(Ocker, Ger.)

It is of the easiest culture, and grows freely, bearing abundantly in any gardeu. Sown at the usual time of all tender vegetables, in drills two inches deep, setting the plants from two to three feet apart.

OR sets, sow the seeds as early as possible in the spring, very thickly, in drills. As soon as the tops die off in summer, remove them to a dry, airy place; and early in the following spring re-plant by placing the sets in shallow drills twelve inches apart, and about four inches apart in the drills; the onions, by this process, are obtained of a large size early in the season. They may also be grown to full size during the first season by sowing thinly in arills one foot apart, and about \(\frac{1}{2} \) inch deep, in March or early in April, in strong land, well manured, and thinning them out to stand three or four inches apart in the drills. They delight in a strong, rich, deep, loamy soil, and succeed well if grown successive years on the same ground.

soil, and succeed well if grown successive years on the same ground.

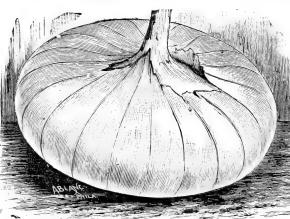

By sowing Onion Seed in frames in February or March, and transplanting in April, onions of immense size can be obtained. For this purpose the varieties Southport Globe (white, yellow or red) and Prizetaker are usually preferred.

Mammoth Silver King. Single onions of this variety, Pkt. Oz. 11b, Lb. grown from seed the first season, have weighed as much as three pounds. It matures early, is a white-skinned and white-fleshed variety, flat shape, and of a mild and deli-15

skin and somewhat flattened shape; extensively grown for sets.....

Southport Yellow Globe. A very large, handsome, globular-shaped, yellow variety, very productive, of mild 15 50

White Portugal, or Silverskin. A large, flat onion of mild flavor; fine for early winter use, and much esteemed for pickling	0.5	00	20	0.00
teemed for pickling.	05	20	60	2.00
large, globe-shaped, firm, fine grained and of excellent flavor, and commands a higher price in the market				
than any other white onion grown	05	20	75	2.40
White Barletta. A very early, small, pure white variety, having a very delicate silver skin, flesh firm and				
mild in flavor. Its great meritover all others is its extreme earliness. For pickling purposes it is unequaled.	05	20	75	2.40
The Queen. A handsome silver-skinned variety; esteemed for its rapid growth, mild flavor and fine keeping	05	20	75	2.40
qualities. Prize Taker. A large beautiful Onion that is seen every fall offered for sale at the fruit stores in Cincinnati	00		, ,	2110
and other large cities. They are a rich straw color of enormous size, averaging 12 to 14 inches in circumfer-				
ence. It is very hard and an excellent keeper.	05	20	60	1.50
Mammoth Pompeii or Giant Red Garganus. This fine Italian variety has produced Onions weighing 4	05	20	60	1.75
to 5 lbs. each. The skin is a delicate red, flesh close grained, nearly white, and of a very mild flavor	00	20	00	1110
dantly, ripens early and sells readily on all markets where a red only is wanted. Our seed is extra selected.	05	15	40	1.25
and y and and a series of the				

ONION SETS.

These are valuable for early use, and where onions from seed cannot be raised the first year.

O raise onion sets from seed, use good ground prepared as for large onions, and sow the seed very thick in broad drills, forty to sixty pounds per acre. If the seed is sown thin, the bulbs will not only be too large for sets, but will not be of the right shape, and if sown thick on poor land, they will be necky or bottle-shaped. When onion seed is sown for sets the seed may be planted somewhat later than for large bulbs, but fine crops are more likely to come from early sowing.

Onion Sets should be planted out as early in spring as the ground is dry enough to work; plant them in rows one foot apart, with sets three or four inches apart. When raised from sets the onions can be used in the green state in June, or they will be ripened off by July.

Our Onion Sets have been kept in good condition, and are recleaned.

White Sets. Yellow Sets. Potato Sets. Top or Button Sets. White Multiplier Sets. 30 cents per quart by mail postpaid. Price per peck and bushel on application.

PARSLEY—(Petersilie, Ger.)

One Ounce to 150 Feet of Drill.

PARSNIP--(Pastinake, Ger.)

One Ounce for 200 feet of Drill. 5 to 6 Pounds for an Acre.

OW seed early in spring, in deep, rich soil in drills. Scatter the seeds thinly and cover evenly with the rake. After the appearance of the plant the soil must be stirred frequently until the leaves cover the ground. The seed is slow to germinate, and is frequently along time in coming up: will vegetate sooner by steeping six to twelve hours in a liquid manure, diluted with water, and mixed with sand before sowing. When well up thin out to five or six inches apart in the rows. Unlike Carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

PEPPER—(Pfeffer, Ger.)

One Ounce of Seed for 1,500 Plants.

OW early in the spring in hot-beds, if possible, and transplant to the open ground when the weather is favorable, or sow in drills in warm, mellow soil, late in the spring, and then thin out so as to stand eighteen inches apart. For the convenience of those who only desire a few plants, and do not wish the trouble of starting them, we will have a supply of strong, healthy plants in pots ready by the middle of May.

Pkt. Oz. 1/4lb. Lb. New Celestial. It is not only a most useful Pepper, but one of the most beautiful plants in existence. The plant begins to set in peppers early in the season, bearing profusely. The peppers are two or three inches long, of clear, sharp flavor. Color, creamy yellow, and, when fully grown, changes to an intense vivid scarlet.

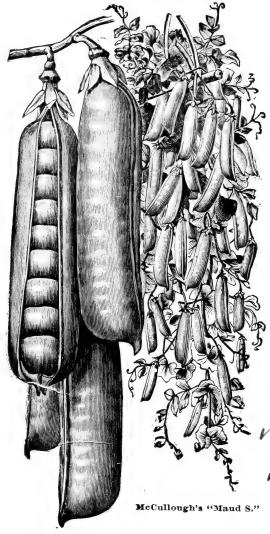

Golden Dawn. Of same shape and size of Large Bell, but of more delicate 75 2.40 flavor; color, yellow.

Large Bell, or Bull Nose. Large and early, rind very thick, color, gloss-red, flavor, mild and pleasant.

Long Red Cayenne. From 3 to 4 inches long, of bright-red color, very 75 2.40 05 75 2.40 75 2.40 Monstrous, and different shape. Fruit 5 to 6 in. long, and about 31/2 in. through; bright red color. Ruby King.

PEAS. (Erbsen, Ger.)

One Quart to 100 Feet of Drill. 11/2 Bushel per Acre.

EAS succeed best in light, dry, loamy soil. Early and dwarf EAS succeed best in light, dry, loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used, let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold, and must be planted later. Sow all the varieties quite early, and depend for succession upon the different times of ripening of the various sorts, or from the first sowing, sow every two weeks until June for a succession. After that there is danger of mildew. Discontinue then until August, when a planting of extra early or Discontinue then until August, when a planting of extra early or early sort will often produce a good crop. Sow the seed in single drills, three feet apart for dwarf sorts, and four for tall sorts, or in double drills six or eight inches apart, one inch apart in the drill, and not less than four inches deep, or for the late sorts seven to eight inches deep, since deep planting prevents mildew and pro-longs the season. Cultivate well, and draw the earth twice to the vines during growth. Stake the tall varieties when they begin to vine. Pick the pods as soon as fit, and allow none to ripen on the vines, as they will then cease bearing.

Wrinkled varieties are marked thus*

Extra Early Varieties. "MAUD S."

The Earliest and Most Prolific Pea Known.

The Earliest and Most Prolific Pea Known.

For several years past, we ourselves, and also many of the largest and most experienced truckers, have made comparative trials with other leading brands of extra early Peas, and in every case McCulough's Maud S. was the first ready to pick by from three to five days. The pod is of a dark green color, of a full round shape, and of strong texture, which especially fits it for shipping long distances. It does not require stakes or brush of any kind for support. It is an even cropper, and can be gathered clean in two pickings. For a late fall crop it has few equals, and is the market gardener's favorite for all seasons. The far northern point at which our Peas are grown renders them almost proof against cold, and the best for early spring or late fall crop. While thousands of market gardeners have pronounced this Pea Unequaled in Earliness, Yield and Regularity of Growth, and in every sense a perfect trucker's pea. Make first planting as early REGULARITY OF GROWTH, and in every sense a perfect trucker's pea. Make first planting as early in the spring as the ground will permit, and cover Pkt. Pt. Qt. Peck.

Connecticut Field. A large, yellow variety

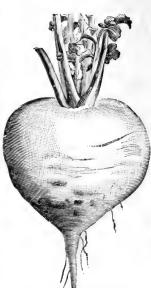

RADISH-(Rettig, Ger.)

One Ounce to 100 Feet of Drill. 8 to 10 Pounds for an Acre.

Radishes thrive best in a light, rich, mellow soil, they must make a quick and tender growth; heavy or clay soils not only delay their growth, but produce a much inferior crop in appearance and flavor. Sow for very early use in hot-beds during the winter or early spring, or later on in shel-tered borders, in well-manured, deeply dug, and finely-raked soil; if not well-stimulated into a rapid growth they become fibrous and tough. Sow in drills ten inches apart, and thin to two inches in the rows. Sow at intervals of two or three weeks until September for a succession. The winter varieties should be sown in July and August; like the Turnip, they make the best growth in the autumn, and must be taken up before severe frost, and stored away in a cool cellar in sand.

McCullough's Cincinnati Market. Much grown by the Cinchnatismarket, Much grown by the Cinchnatismarket gardeners, and the handsomest long radish in cultivation. It is a glossy scarlet, very small top, grows seven inches in length. Skin, very thin; flesh, crisp and brittle and of a delightful pungent quality. Undoubtedly the finest long red Radish for foreign and will outsell any on the est long red Radish for ting, and will outsell any on market, also an extra fine sort for

and sixteen cents per Quart.

SQUASH. (Kurbiss, Ger.)

One Ounce of the Bush Varieties for Forty Hills, or of the Large-Seeded Kinds, Fifteen Hills. Two or Three Pounds of the Bush, and Three to Four Pounds of the Large-Seeded for an Acre.

Is useless to sow until the weather has become settled and warm. Light soils are best suited for its growth. Prepare hills for the seeds by incorporating two or three shovelfuls of well-rotted manure with the soil for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their rough three or four of the strongest plants, after which cultivate same as cucumber.

Summer Varieties.

Pkt. Oz. ¼lb. Lb Mammoth White Bush. The best early variety for market or shipping. It grows to a large size, scalloped like a pattypan and bearing an abundant crop.

Early Vellow Bush. An early, flat scallop shaped variety; color yellow; flesh pale yellow and well flavored; very productive; used when young and tender.

Summer Crook-Neck. The old standard sort; very early and productive. Fruits about one foot long, with crooked neck, and covered with warty excrescences; color bright yellow; shell very hard when ripe.

Straight-Neck Summer Squash. Market gardeners who ship early squash to distant markets, know the difficulty of packing the crooke neck always seeming to go just where it is not wanted. In the "Straight-Neck," the bad feature of the crooked has been overcome, and by continued selection the size has been increased, more uniformity in shape secured, and quality improved. Mammoth White Bush. The best early variety for market 10 20 50 10 20 50 05 10 20 50

Hubbard Squash.

ΓΟΜΑΤΟ

(Liebesapfel, Ger.) One Ounce of Seed will produce about 2,000 Plants; ¼ lb, to the Acre.

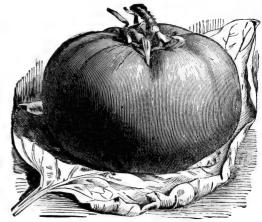

OW in a hot-bed greenhouse, or window in a sitting-room, where night temperature is not less than sixty degrees, about the first week in March, in drills five inches apart and half an inch deep. When the half an inch deep. When the plants are about two inches high they should be set out in boxes three inches deep, four or five inches apart, in same temperature, or removed into small pots, allowing a single small pots, allowing a single plant to a pot. They are sometimes transplanted a second timeinto largerpots, by which process the plants are rendered more sturdy and branching. About the middle of May, in this latitude, the plants may be set in the open ground. They are leasted for early crops on open ground. They are planted for early crops on light, sandy soil, at a distance three feet apart, in hills in which a good shovelful of rotted manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the

time of transplanting, and shelter from the sun a few days until the plants are established. For late use, sow in a sheltered border in May, and set out the plants in July; the green fruit can be picked off before frost, and ripened under glass. By training the tomato vines on trellises, or tying to stakes, they will increase in productiveness, the fruit will ripen better, and be of finer quality. All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds Pints, Quarts, and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per round and sixton per terms and the property and the

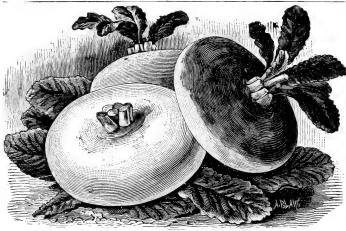

pound and sixteen cents per quart.

TURNIP.

(Ruben, Ger.)

One Ounce will Sow 150 Feet of Drill. 1 to 11/2 lbs. to the Acre Drilled or Broadcast.

The soil for Turnips should be rich and mellow. For an early crop, sow early in the spring, in drills about a foot apart, or broadcast and thin/ out. For a general crop, sow from the first of July to the last of August, in drills eighteen to twenty inches apart, and thin out the plants to 8 or 10 inches. To destroy the fly, which is very destructive to the turnip crop, use "Hammond's Slug Shot." Sow an abundance of seed, and thin out. Should the crop be destroyed, harrow the

HERB SEEDS.

Sow early in April or May, in a sheltered, well-prepared spot in the open ground, either broadcast or in shallow drills about seven inches apart. Thin out the plants thus raised, and keep clear from weeds. A few sweet aromatic and medicinal herbs are very valuable for flavoring soups, etc., and care should be taken to harvest them properly on a dry day, as they come into full blossom, then dry quickly and pack closely, entirely excluding the air.

brossom, then dry quienty and pack crossry, chartery excitating the air.

DIRECTIONS FOR THE CULTIVATION OF FLOWERS FROM SEED.

ANNUALS are plants which flower, produce seed, and die the same year they are sown; Biennials, those which are sown one year, bear their flowers and seeds and die the next; under the term "Perennials" are classified those which grow and flower for several years; and included in one or the other of these classes are hundreds of floral gems. These three classes are each again divided into hardy and half-hardy sections, and, as they require different modes of treatment for their successful cultivation, the few details we give under each heading may be useful to those who have had but little practice amongst them.

HARDY ANNUALS are such as can with safety be sown in the open ground, requiring no protection; they will grow in almost any ordinary garden soil, and, if judiciously selected and sown in succession, they are capable of yielding a profusion of flowers, equal in many respects to the "summer bedders" which often occasion so much anxiety and care. The object to be aimed at in the culture of Annuals should be a steady and fairly vigorous growth, the desideratum being flowers and plenty of them, and not an over-luxuriant growth with a scarcity of blossoms, as is nearly always the result of a too liberal application of manure.

Sow in April or May, either in their permanent place in the open ground, or in shallow boxes two or three inches deep, placed in a warm window, or in a hot-bed, the latter method being generally preferable, as plants grow hardier by being transplanted. The selection of the soil is a very important point; a light, rich, sandy loam, not too wet or too dry, makes the best seedbed, and is often improved by the addition of a little pulverized charcoal. Smooth the surface before sowing, cover the seed with sifted earth, and keep the soil always moist.

The absolute essential of successful flower growing is not to bury the seed too deep. The very best of seed can not grow when choked with soil. Amateurs fail here oftener than at any other point, and the seeds and the seedsmen are unjustly blamed for the failure. Generally, seeds should not be covered to a depth greater than two or three times their diameter. Fine seeds, such as Portulaca, etc., ought not to be covered at all, or but slightly, pressing it down with a strip of board. Sun and light must be excluded from the newly sown seed—cover with paper held down by sticks or stones until the seed has germinated, and then admit gradually the air and light. Knowing the height and general habit of the plant, thin accordingly, always leaving sufficient space between them for each plant to fully develop itself. Any neglect in this particular is fatal to the production of fine flowers, a little extra trouble in thinning being amply repaid by the greater profusion and lengthened duration of the blossoms. Keep them free from weeds, run the hoe amongst them occasionally, and water if necessary at any time.

Half-Hardy and Tender Annuals. This section comprises some of the most useful and interesting plants, suitable for the summer decoration of the flower-garden, but being of a rather tender nature they require careful treatment in the first stages of their growth. For flowering in the open air, the first sowing is made in heat, in March or April, and the second in the open ground, when the risk of frost has passed. For early sowing, use shallow pans or boxes, well-drained and filled with a nice light compost of loam, leaf-mould and sand; place them in a frame where they can have the advantage of a little mild bottom-heat, and there they will germinate quickly. When large enough, prick out into a little stronger compost, either in pots or boxes, or under hand-lights, and gradually harden off, for planting out in May. If only a few are required, and not very early, they should be sown thinly on a half-spent hot-bed or in the house. If sown after the middle of May they may be planted in the open ground like Hardy Annuals. In the case of very small seeds, such as Petunia, Lobelia, etc., the covering of soil should be very thin, bearly hiding the seeds, and as seeds so small are liable to be carried down into the soil unless very carefully watered, it is even advisable to moisten the surface of the soil before sowing instead of afterward. Toward the end of May, when the danger from night frosts is past, the plants can be transplanted to their permanent positions in the open bed or border. Tender Annuals should be sown in the same way as the Half-Hardy ones, at any time from the month of February, according to the peculiarities of each. The plants should be potted off singly into rich compost, and kept as close to the glass as possible. Repot when necessary, and grow on in heat rapidly until the plants are well advanced. Keep them well supplied with water, and a uniform temperature must be maintained, so that they may not receive any check whilst growing. They should then be gradually hardened off, so as to be ready for placing in the conservatory as they come into flower. Many of the varieties may be planted in the flower-garden about the middle of June, where their neat and attractive appearance will add considerable interest to the summer display.

Hardy and Half-Hardy Biennials and Perennials. Under the heading of Biennials and Perennials are included many of our finest flowering plants, which are often neglected because they do not bloom the first year from seed. This long waiting for bloom may in many cases be avoided by treating the seeds as recommended for Half-Hardy Annuals, and starting them sufficiently early to form large, strong plants by the time they should be planted in their permanent quarters. The hardier species and varieties of Biennials and Perennials may be sown at the same time as Annuals, if desired, always choosing showery weather and a shady situation for the operation; but if they are wanted for flowering the following spring, sow in May or June, and again at the end of August or beginning of September. The plants raised from this later sowing should stand in the seed-bed all winter, and be transplanted the following spring. Those raised in May or June should be pricked out thinly on a nice piece of ground, and encouraged to make a good growth before they are lifted and planted out in October. Many of the species improve by age, forming large clumps or bushes, and, by being divided occasionally, the stock is increased and the plants invigorated. Half-hardy and Tender subjects should be treated, in a general way, as if they were Annuals, with regard to their propagation and subsequent culture.

Seeds of Green=House Plants. These can be sown at any season of the year, but extra care should be given them, especially to such varieties as Begonias, Calceolarias, Cinerarias, etc., as the seeds are very small and delicate. Sow the seed in well drained pans, choosing for soil a fine sandy leaf-mold; press it firmly, smooth the surface and sow the seed very evenly; cover with a light sprinkling of sand or not at all, lay a pane of glass over the pan, place it in a close frame and keep shaded. Most failures are due to mistakes in watering, which should be done very carefully; the seed pans should never be allowed to dry out, as one neglect will kill the seeds just starting, while on the other hand a slight excess of water will cause the seeds to rot. After the plants are up, remove the glass and prick into other pans with the same soil; great care should be taken not to pull the plants or tear the roots in transplanting; lift with a trowel or stick and shift with good roots. Keep them shaded after transplanting until the young plants are well established in the new soil. As soon as the plants touch each other, transplant again into small pots with similar soil, using the same precaution of shading at first, if troubled with green flies, fumigate occasionally with tobacco.

Pretty trailing plants, producing clusters of sweet-scented, Verbena-like flowers, especially fragrant toward evening, lasting in bloom a long time; effective in beds, rock-work or hanging-baskets. Peel off the husk before sowing the seed. Half-hardy annual.

1 Umbellata. Rosy lilac, white eye; 1/2 foot...... 5c pkt.

BUTILON.—(Chinese Bell Flower.)

Greenhouse shrubs of easy cultivation, with beautiful drooping bell-shaped flowers of various colors; can be planted outside during the summer. Half-hardy perennial.

ACACIA.

Elegant half-hardy shrubs, having fine ornamental foliage, and beautiful racemes of various shades of yellow globular flowers. Soak the seed in warm water before sowing.

ACHILLEA THE PEARL.

4 A very free-blooming, hardy perennial plant, of branching habit. Useful for cut-flowers or for plauting in cemeteries. Pure white double; 1½ feet.......10c pkt.

ACROCLINIUM.

A beautiful class of everlasting flowers. Charming border plants, and valuable for winter bouquets. The flowers should be cut before they are fully open. Halfhardy annual.

ADONIS.—(Flos Adonis.)

Showy hardy annual of easy culture, with pretty

ADLUMIA.—(Mountain Fringe, or Allegheny Vine.)

Abutilon.

An attractive and beautiful plant, flowering the first season; of graceful habit and pale green feathery foliage. Hardy biennial.

Cirrhosa. Pale pink; 15 feet.......5c pkt.

AGROSTEMMA.—(Rose of Heaven.) An attractive free-flowering hardy perennial of easy culture, producing flowers on long

slender stems like a single pink. Blooms the first season. Fine for cutting; 1 to 2 feet.

Mixed Varieties.

AGERATUM.

Valuable plants for large beds or borders, and very useful where cut-flowers are in demand; in bloom the whole summer; also good for winter blooming, of easy culture, succeeding in any soil. Half hardy annuals.

	PER PKT.

Grandiflora. Fine for culture in house or conservatory, beautiful spikes of sweet-scented blue flowers. Tender perennial, 1½ ft...10e pkt. Grandiflora Alba. A fine new plant for pots. The pure white sweetbeautiful scented flowers are freely produced, and contrast well with the dark green foliage.....

ANTHERICUM.

Liliastrum (St. Bruno's Lily). White with delicate spots 5c

ANTIRRHINUM. (Snapdragon.)

Antirrhinum-Tom Thumb.

ASPERULA.

ASTERS.

The Aster is one of the most popular and effective of our garden favorites. For beauty and variety of habit, form, and color, it stands unrivaled. No family of plants bears such distinct marks of progress in the last few years, in improved strains and new varieties. Give the Aster a deep, rich soil, and a mulching of coarse manure is very beneficial. A little liquid manure occasionally will give good results. Sow early in the house, and transplant into pots or boxes. As soon as the weather is warm enough, plant in beds about twelve inches apart. Half-hardy annuals.

AQUILEGIA.—(Columbine.)

Popular free-flowering plants, blooming profusely through the spring and early summer, and of easiest cultivation. Hardy Perenniai 1 to 2 feet.

spurs 10c
Chrysantha. Golden yellow, fine 5c
Coerulea Hybrida. Large sulphur yellow flowers, blue spurs

Skinneri. Scarlet quite distinct....

ASPARAGUS SPRENGERI.

Also called Emerald Feather and Abyssinian Parlor Fern. 47 Highly praised everywhere; handsomest seen drooping from a pot or basket. Sprays 4 to 6 feet long, of fresh, green, feathery foliage, useful for bouquets, wreaths or sprays, remaining perfect for weeks after cutting. Grows freely the whole year round; extremely valuable for all purposes10c pkt.

ARISTOLOCHIA.—(Dutchman's Pipe.)

A climber, with very novel flowers. It grows very rapidly from seed, flowering the first year, if sown early, and is a very pretty vine for outside decoration in summer. Blossoms profusely, even on small plants. Perennial.

48 Sipho. Thirty feet.....

Triumph Aster.

52 Betteridge's Improved Quilled. Perfectly double, large showy flowers;

Giant Comet.

A distinct race; Large flowers with long, loose, wavy petals; very double and profuse bloomers; a most desirable sort.

Azure. Blue.....10c Crimson.....10c The Bride. White passing to rose.....10c

Dwarf Queen Asters.

A beautiful new class of large-flowering asters of dwarf habit; bearing protusely full double imbricated flowers of great beauty.

Cosmos.

COSMOS.

Beautiful autumn-blooming plants. The flowers are borne profusely on long stems, and present a charming appearance when the plants are in full bloom. Should be sown in spring, in the open ground, when danger of frost is past, or the seed may be started under cover and afterwards transplanted. It is of the easiest culture, planted about eighteen inches apart in rows or in masses in beds. When the about eighteen niches apart in rows or in masses in beds. When the plants are about a foot high, the tops should be pinched out to induce a bushy growth, and this should be continued until the middle of July, when they should have formed nice bushy plants three feet high by the same in diameter. They produce, from September until cut down by frost, thousands of beautiful flowers, furnishing an abundance of cut blooms for autumn decoration when other flowers are scarce.

seed sown early.....

Helianthus.

Early free-flowering plants. Admired for their silver-like seed pods. Hardy biennial.

HOLLYHOCK.

Few hardy plants combine as many good qualities, or lend themselves as readily to varied uses, as the Hollyhock. For planting in rows or groups on the lawn, or for interspersing among the shrubbery, they are invaluable. The flowers form perfect rosettes of the most levely colors. It is not surprising that this old favorite should again become popular; for, by careful selection, the flowers have been so much improved that they are marvels of beauty and elegance. The Hollyhock requires a rich, deep soil, well drained, and will repay, in quantity and elegance of bloom, any extra care. A slight protection during winter will be beneficial. We make a specialty of Hollyhocks, and the seed we offer is saved from the very best double flowers of pure and bright colors. Seeds sown during the summer make strong blooming plants for the following year.

PER PKT.

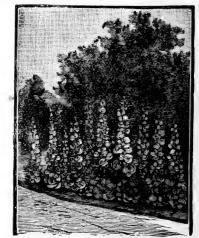

Heuchera Sanguinea Splendens.

363 Mammoth Fringed Allegheny.

The mammoth flowers are wonderfully formed of loosely arranged fringed petals, which

look as if made from the finest China silk. The color varies from pale pink to deep red. The plants are of majestic growth, sending up spikes six to seven feet high, and is of a strong constitution, not being troubled with the disease so prevalent among Hollyhocks. Improved Trimardeau Giant.

PETUNIA.

For out-door decoration or house culture few plants are equal to this class. They commence flowering early, and continue a mass of bloom throughout the whole season, until killed by frost; easily cultivated, requiring rich soil and a sunny situation. Of late years the single-striped, mottled, and double varieties have been greatly improved. The seeds of the double Petunia do not possess as much vitality as those of the single, and a good deal of care must be used to get them to germinate; nor will they all come double. There are two distinct kinds of single Petunias—the Grandiflora sorts, with large flowers, and the small flowered section, which gives abundance of bloom. Annuals.

SWEET PEAS.

Flowering Peas are among the most useful and beautiful of all our hardy annuals. Nothing can be better for large bouquets, as the flowers are lively and delicate, varying in color from darkest purple imaginable, and including the brighest pinks; as fragrant as Migropatte. imaginable, and inclu fragrant as Mignonette.

THE NEW METHOD OF CULTIVATING SWEET PEAS.

CULTIVATING SWEET PEAS.

The principal essential for the best success is a cool, deep, moist soil, and a sunny situation. The ground should be prepared deep and rich. Fall preparation, where possible, is preferable, but if done in the spring, use no green manure. Bone meal is good if old rotted manure can not be obtained. Sow early, even before the frost is out of the ground, as Sweet Peas need the cool, moist spring ground to make the root growth. In the latitude of Cincinnati, February is not too early. In the South, sow in the fall. Sow the seed in deep furrows, the bottom of which must be at least six inches below the level of the soil; this is to guard against a summer drought. Cover the seeds only one inch, after which the furrow is still five inches deep. When the plants are two or three inches high, fill in another inch or so of soil around the plants, always leaving a portion of the plant above the surface; do this at intervals, until the furrow is nearly full; it should always remain a little hollow, to hold the rains, and to allow water to be applied by the bucketful in dry weather.

weather.

Mulching with old leaves, straw or hay assists in the retention of even moisture and temperature for the roots; any fresh manure or other heating material must not be used. Under such congenial conditions Sweet Peas luxuriate and bloom in continuous abundance from early summer until cut down by frost, provided the flowers are freely picked each day, and no pods are allowed to develop.

Our Sweet Peas are unsurpassed, having been selected from the finest strains. They include all the improved Large-flowering varieties, of recent introduction.

STOCKS, OR GILLIFLOWER.

The Ten Weeks or Annual Stock presents nearly or quite all The Ten Weeks or Annual Stock presents nearly or quite all the requisites of a very perfect flowering plant, good habit, fine foliage, beautiful flowers of almost every desirable tint. Seeds of the Stock may be sown in the open ground, or in the hot-bed or cold-frame; but, if transplanted, let this be done when the plants are small, just out of the seed-leaf, or the plants become slender, and never make good plants nor flower well. A little shade from the hottest sun, and water in the evening, will add much to the size, beauty and durability of the flowers. Set a foot apart. Make the soil deep and rich. Some of the varieties are desirable for winter flowers, and are used for this purpose

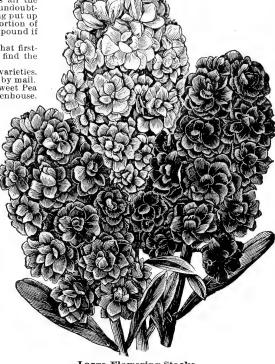

Giant Perfection Ten Week Stock.

This magnificent strain is without a rival for open-ground planting, attaining a height of 2½ feet. The spikes of bloom are very long, and the individual flowers are enormous in size and PER PKT.

Large-Flowering Stocks.

Biennial Stock.

This class should be sown before July, and protected during the winter; or, better yet, to be kept over in cold-frames and planted out in the spring; they will then begin to flower in May, and continue through the season.

PER PKT.

689 Brompton, Finest Mixed. Large-flowering double.....10c

Intermediate, or Autumn Stock. Sown in the spring, they will flower in the autumn.
690 Mixed. Very beautiful double flowers. 2 feet......10c

Snow-on-the-Mountain. (See Euphorbia.)

WEET WILLIAM. (Dianthus Barbatus.) A well-known and popular flower, which has been improved the last

few years, making it a most desirable plant for the garden. The double and single varieties, with their rich and varied colors, produce a charming effect for beds or borders. Seed planted early will bloom in the fall. It is better to sow seed

every year, to have young plants, as they flower more freely. Hardy perennial.

691 Auricula Eyed Perfection. Splendid variety of colors with clearly defined eye5c pkt.

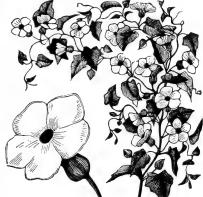

692 Double, Extra

Summer=Flowering Bulbs and Roots.

Our Prices Include Postage on Single Bulbs and by the Dozen, Except Where Otherwise Noted. Bulbs Quoted by the Hundred are not Sent Prepaid.

Single Tuberous-Rooted Begonias.

AMARYLLIS.

Plant in equal parts sandy loam and leaf mold. If convenient, start in hot-bed, beginning with fifty degrees of heat, increasing to sixty or seventy. When the leaves appear, water carefully and not in too great quantity. The Formosissima and Rosea planted in May make rich and showy border plants.

Atamasco Rosea. These are very ornamental, and flower all summer. Delicate pink......5c each, 50c per doz.

Belladonna Major. Trumpet shaped. Dark rose and white,

Large beautiful flowers, of a bright salmon pink, with snow white throat......15c each, \$1.50 per doz.

white throat......

Johnsonii. Crimson, striped with white, very fine,

25c each, \$2.50 per doz.

Formosissima. Rich, velvety crimson, fine.........10c each, \$1.00 per doz.

BEGONIAS, TUBEROUS=ROOTED.

The Tuberous-Rooted Begonias are among the handsomest of our summer-flowering bulbs. They are not grown to the extent they should be, for they require no more care than Geraniums, have as fine a range of color, and will bloom continuously throughout the summer.

Single Varieties. Mixed colors......10c each, \$1.00 per doz. Double Varieties. Mixed colors......20c each, \$2.00 per doz.

CANNAS, CROZY'S EVER-BLOOMING.

These varieties have become famous for the immense size and color of their flowers, the graceful and highly ornamental foliage, together with their dwarf habit of growth, are fast becoming most important plants for decoration.

Alphonse Bouvier. Deep rich, velvety crimson; strong grower, green foliage. 6 feet.

Alsace. Sulphur yellow, changing to creamy white without spots; vigorous grower, green foliage. 4 feet.

Austria. Pure canary yellow, with reddish brown dots in the centre of the two inside petals. Large open flowers. 6 feet.

Beaute Poitevine. An excellent free-flowering crimson that is especially valuable in a hot, dry season, succeeding better under these conditions than any other variety. 3 feet.

Burbank. Rich canary yellow, lower petals spotted crimson. 6 feet.

Charles Henderson. Bright vermilion red, penciled with yellow in the centre; compact, dwarf with very large flowers. $3\frac{1}{2}$ feet.

Egandale. A fine dark foliaged variety, with flowers currant red; very distinct ing appearance. 4 feet. and striking appearance.

Flamingo. Glowing crimson, flowers large, gracefully reflexed and of fine form; dark green foliage. 4 feet.

Florence Vaughan. Rich golden yellow, spotted bright red. 4 feet.

Italia. Orange scarlet, with a broad golden yellow border. The flowers, which are produced on massive stems about sixteen inches long, are set well above the foliage. 5 feet.

J. C. Vaughan. Deep orange scarlet, large truss; bronzy purple foliage. 41/2 feet. Madame Crozy. Dazzling crimson scarlet, bordered with golden yellow; foliage bright green. 4 feet.

Mile. Berat. Rosy carmine. Petals long, and hang gracefully upon the flower stalk. A bed of this variety is simply superb. Foliage green. 5 feet.

Queen Charlotte. Rich scarlet, with a wide, bright gold band around each petal; large flowers, green foliage. 3 feet.

Sam Trelease. Rich glowing scarlet, edges and centre marked with yellow. The flowers open out flat, with broad petals of good substance. 3 feet.

Souvenir Antoine Crozy. Intense scarlet crimson, with a broad, rich golden yellow edge, and does not fade or scorch in the hot and dry weather. Flowers are very large, of great substance, opening flat. 3 feet.

The above named Cannas 10 cents each; \$1.00 per dozen.

Crozy's Dwarf Varieties Mixed......8c each, 75c per doz. Black Beauty. Large massive foliage of the richest bronzy purple color shaded with black, the edges of leaves gracefully undulating. Where foliage effect alone is desired, nothing richer or more handsome can be found.

10c each, \$1.00 per doz. Robusta Perfecta. A distinct and handsome sort, bearing immense leaves 11 to 18 inches wide and three feet long, of a bright, bronze-red color; 6 to 7 feet high. With good cultivation grows 10 feet......10c each, \$1.00 per doz.

FANCY-LEAVED CALADIUMS.

Fancy-leaved Caladiums have, in recent years, grown very rapidly in popular favor, not only for the decoration of the conservatory, greenhouses and window-boxes, but nearly all of the varieties succeed admirably if planted out of doors, when the ground has become warm, in partly shaded, sheltered borders, in well-enriched light soil while for exhibition plants at fairs, etc., during the summer and fall months, nothing can equal their beauty.

Fancy-Leaved Caladiums.

Boildieu. Deep green, with bright crimson rayed centre.

Chantini. Green, red centre, spotted white.

E. G. Henderson. Green, with transparent rose spots and mottled crimson rayed centre.

Caladium Esculentum.

Louis Buplessis. Red rays and veins on a white ground, with green margin.

Max Kolb. Light green ground with gray centre and red spots.

Mme. F. Keechlein. White ground, violet rose ribs, green veins. Reine Victoria. Green, spotted with white and crimson.

Wightii. Dark green, with white and red spots.

Price, 25 Cents Each. \$2.50 Dozen.

Spotted Calla.—(Richardia Alba Maculata.)

Leaves deep green, with many white spots. Flowers, pure white, with black centre. Culture easy; bloom freely10c each, \$1.00 doz.

Black Calla.—(Arum Sanctum.)

From the Holy Land, resembling in habit and foliage the White Calla, flowers of a rich blackish purple, and very large.......15c each, \$1 50 doz.

CINNAMON VINE.

A rapid-growing climber. The leaves are heart shaped, bright glossy green; growth is very rapid, reaching about 8 feet in height; quite hardy.

10c each, \$1.00 doz.

DAHLIAS.

Put Dahlia tubers in the ground when the season becomes warm, covering the neck some three inches. After flowering, and before hard frosts, take up the plants, remove the tops, dry the bulbs a little, and put in cellar until Spring, when they can be divided and replanted.

A. D. Livoni. Soft pink, with quilled petals and full to the center; long stems. An early and profuse bloomer.

Crimson Ball. Bright crimson purple; perfect shape and full to the center; dwarf, vigorous grower and constant bloomer.

John Sladden. Darkest maroon, almost black; a superb flower.

Mary Hallock. Golden yellow; petals beautifully quilled; perfect form.

Storm King. Snow white; perfect form and full to the center; early, profuse and constant bloomer; a strong vigorous grower of branching habit. As a cut-flower variety, it is the Florists' ideal.

White Dove. Pure white; petals beautifully quilled; long stems. Fine for cut flowers.

Clifford W. Bruton (Cactus). Canary yellow; immense size and perfect form. A tall vigorous grower and extremely free bloomer.

Henry Patrick (Cactus). Pure white; large size, long stems; fine for cutting.

Nymphea (Cactus). Clear, distinct shrimp pink, shading slightly darker towards the outer petals; extensively grown for cut flowers.

Wm. Agnew (Cactus). Intense glistening scarlet crimson; immense size, perfect form; free flowerer. Very effective as a bedding plant or cut-flower.

Canary (Pompon). Pure yellow; fine form, full to the center; long stems, and a profuse bloomer.

Guiding Star (Pompon). Pure white; the edges of the petals are beautifully fringed; dwarf, bushy and free flowering.

Little Beauty (Pompon). Delicate shrimp pink, of full round form and beautifully quilled petals; long stems; especially adapted for bouquets.

Queen of Dwarfs. Crimson scarlet; perfect form, free flowering.

GLADIOLUS.

The most attractive of all summer flowering bulbs are the Gladioli. Wouderful improvements have been made in recent years in the size and beauty of these flowers, and our list comprises only the best selections, both in our mixtures and named sorts. Their cultivation is very simple, as they will thrive in any ordinary garden soil, but amply repay care and liberal feeding by enhanced size and beauty. A succession of bloom may be had from July to September by planting at intervals from April to June. The strongest bulbs should be kept for the latest planting. Plant six inches apart in beds or double rows, and three inches deep. They are very effective when planted among roses, shrubbery, etc. In the fall, before frost, the bulbs should be lifted, dried and stored in a cellar or some other position away from frost, for planting again the following spring.

Africain. Darkest crimson, with a pure white blotch on throat. The most attractive of all summer flowering bulbs are the Gladioli.

Africain. Darkest crimson, with a pure white blotch on throat.

Africam. Darkest crimson, with a pure white blotch on throat.

Brenchleyensis. Bright vermillion scarlet.

Duchess of Edinburgh. Purplish rose, carmine stripe on lower petals.

Gen. Sheridan. Large bright scarlet, with pure white blotch on lower petals.

Isaac Buchanan. Pure yellow; a beautiful flower.

La Candeur. Pure white, lightly striped with carmine violet.

Lord Byron. Brilliant scarlet, blotched pure white.

Martha Washington. Fine spikes, light yellow, lower petals tinged with rose.

with rose.

May. White ground, slightly striped crimson.

President Lincoln. Blush white, suffused with bright rose. Shakespeare. White, suffused carmine rose, large rosy blotch.

Above Named Varieties 10 Cents Each. \$1.00 Per Dozen.

Snow White. The flowers are of fine shape, large in size, and of a

pure paper-white color, seldom showing a trace of any other shade. The spikes are large, and set thickly with flowers, loc each, \$1.50 per doz.

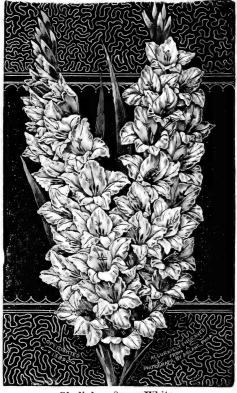

Lemoine's Hybrids, Superfine Mixed. A beautiful and remarkable class of Gladiolus, which for vivid and rich orchid-like coloring have no equal; in the blotch, which is a remarkable and training for the blotch of the same straight for the blotch of the same showing is expensionally for a same showing is expensionally for the same showing in the same showing is the same showing in the same showing in the same showing is the same showing a trace of any other showing a trace of any o

ing have no equal; in the blotch, which is a remarkable and typical feature, the coloring is exceptionally fine.

See each, 40c per doz., \$2.50 per 100.

New Giant. A magnificent new race of extraordinary size and remarkable beauty. These new varieties are twice the size of the Gladiolus Gandavensis varieties, while possessing their long-lasting properties, and the beautiful markings of the Lemoine section. Mixed varieties........10c each, 75c per doz., \$5.00 per 100.

Banning's Superb Mixture. We can safely say this is the finest mixture procurable. It is made up from the lightest colored and largest flowering varieties; especially recommended to those who desire to grow them for cut flowers...5c each, 50c doz., \$3.00 per 100.

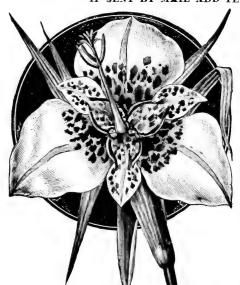

Gladiolus-Snow White.

Tigridia.

GLOXINIA.

Magnificent for house culture, producing in great profusion beautiful flowers of the richest and most beautiful colors. They succeed best in sandy loam and peat, and require a moist heat. After blooming, dry off gradually, let the bulb remain in the pot without water, and keep in a warm place until they show signs of starting again.

HYACINTHUS CANDICANS.

KAEMPFERI. (Japan Iris.)

One of the most astonishing tribes of plants ever seen, both in its robust, free-blooming habit, and in the superb loveliness of its immense flowers. These differ from the other Irises in having the blossoms broad and flat, like a Clematis, growing best in moist, rich soils.

MADEIRA or MIGNONETTE VINE.

A rapid-growing vine, covering a large space in a short time. Fleshy, heart-shaped leaves of a light green, and numerous racemes, of feathery flowers of delicious fragrance. A beautiful and popular vine. 5c each, 40c per doz.

TIGRIDIA. (Shell Flower.)

Curious and beautiful shell-like flowers about four inches in diameter, flowering from July to October. The bulbs can be planted about the middle of May, and taken up in October and kept over winter in dry sand.

LILIES.

No class of plants can lay so much claim to our attention as the Lilies. They are stately, elegant and beautiful, and possess the most agreeable perfume, and for general effect, whether growing in garden or house, they have no rivals. The soil should be rich, deep and mellow, with good drainage, as nothing will injure the bulbs more than water collecting and standing around them. Do not put manure about the bulbs when setting, as it collects moisture and insects, and often causes the bulbs to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and strawy manure to exclude the frost. Set bulbs four to six inches deep according to their size. the frost. Set bulbs four to six inches deep according to their size.

Auratum. (Golden Japan Lily.) This superb Lily has flowers 10 to 12 inches in diameter, composed of six white petals, thickly studded with rich chocolate-crimson spots and a bright golden

of the most popular garden varieties, also excellent for pot culture, of easy growth, and may be relied upon to give satisfaction, growing two to four feet high, and blooming in August.

MONTBRETIA CROCOSMIFLORA.

(Summer-Flowering.) OXALIS.

Valuable for edging walks, flower beds, etc. Bulbs planted three inches apart form rounded rows of delicate foliage, about one foot high, which produce flowers in endless succession.

Lasandria. Fine, rosy pink, beautiful cut foliage. This is the tallest, and when planted in a bed with Dieppi should occupy the

CRINUM.

Magnificent flowering bulbs belonging to the Amaryllis family, and are of easy cultivation in the open ground, and, when taken up in the fall, can be dried off and carried through the winter like other bulbs. They can also be grown in pots and treated like Amaryllis, and, like most of its class, they bloom best when somewhat pot-bound.

Crinum Americanum. Large, white, fragrant, lily-like flowers....15c each, \$1.50 doz.

Crinum Kirkii. This magnificent variety produces flowers of the greatest beauty.

Usually, two flower stalks of dark purplish color are sentup at the same time, each bearing a large umbel composed of a dozen or more enormous lily-like flowers of wondrous beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe through the centre. Extra large bulbs, 35c each, \$3.50 doz.

If by mail, 10c each extra.

TUBEROSES.

One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skillful management a succession of flowers may be obtained all the year round. For early flowers they can be started in February or March, in the greenhouse or hot-bed; and for a succession they can be planted at intervals as late as August, For flowering in the open border, plant about the first of May.

Excelsior Pearl. Much super or to the ordinary Double Pearl Tuberose. This variety is characterized by its short, robust stem, and long spikes of flowers, which are more double and twice as large as those of the old sort

4c each, 35c per doz., \$1.75 per 100. Dwarf Pearl. Large size......3c each, 25c per doz., \$1.25 per 100. Double, Tall. Extra large bulbs......4c each, 35c per doz., \$1.75 per 100.

NEW BRANCHING TUBEROSE ALBINO.

This charming single-flowering Tuberose is of the purest white, both inside and out, even in the hottest sun, the petals recurve gracefully, flowering much earlier than the old single variety, and producing from two to five flower stems from a single bulb. The odor is less heavy than that of the Double Tuberose.....5c each, 50c per doz.

Albino Tuberose

CARNATIONS. (For Summer Flowering.)

The following varieties will be ready for delivery in April and May. They are strong plants, especially grown for Summer and Autumn blooming:

America. Scarlet, large size, stiff stem, good grower and free bloomer.

Daybreak. A delicate shade of pink; greatly admired.

Ethel Crocker. Pure pink; large size, long strong stem, free bloomer and vigorous grower; fragrant.

Flora Hill. The finest white; flowers of enormous size; strong stems; free bloomers.

Gen. Gomez. Cardinal maroon, rich and velvety, being free in growth and bloom; stems slender and stiff.

Gen. Maceo. Dark scarlet, with maroon shadings; one of the darkest and richest colors.

Genevieve Lord. A beautiful shade of pink. Flowers largest size, with long strong stems; vigorous growth and free bloomer;

G. H. Crane. Brilliant scarlet; an early and free bloomer, with flowers of large size; sweet.

Mrs. Geo. M. Bradt. Clear white, heavily edged and striped with bright scarlet; flowers very large, and free bloomer.

Olympia. Clear glossy white with delicate pencilings of scarlet running through the petals; flowers largest size; strong stiff stem; free bloomer; fragrant.

The Marquis. Flowers of largest size, of an exquisite shade of soft pink; strong stem; vigorous grower and free bloomer; fragrant. 15 Cents Each. \$1.50 per Dozen.

HARDY GARDEN PINK.

Her Majesty. The flowers of this fine variety are of large size and of the purest white, very fragrant, and borne profusely on stout, erect stems, twelve inches long. It is hardy, and will winter in the open border, or may be grown in cold frames for early forcing.

15 Cents Each. \$1.50 per Dozen. 15 Cents Each. \$1.50 per Dozen.

Palms, Ferns, Araucarias, Etc. SPECIMEN PLANTS A SPECIALTY.

We call special attention to our stock of Palms, Ferns, Araucarias, Ficus, Pandanus and other plants, which is the largest and most complete in the West. We have a full line of sizes, and can offer special inducements on FINE SPECIMEN PLANTS. Whenever possible, we solicit a personal inspection of our stock either at

NURSERIES OF THE McCULLOUGH SEED CO., McCULLOUGH STATION, PLEASANT RIDGE, OHIO, OR AT OUR STORES, 316 and 318 WALNUT STREET, CINCINNATI, OHIO.

Send all correspondence to our Cincinnati Offices.

ARECA LUTESCENS.

PALMS

the dry atmosphere, of dwarf spreading habit

Livistonia Rotundifolia. One of the prettiest Palms, especially suited for table decoration. The foliage is gracefully recurved, forming an almost globular plant.

St.50 to \$5.00.

Combination Palms. Many prefer this class of plant. The center plant is tall, with three small plants around it, the whole forming a handsome bushy specimen.

\$4.00 to \$15.00.

It is impossible for us to give an adequate description of the various sizes we can offer, as we have a fine stock of Specimen Plants, but our long experience enables us to assure our customers FULL VALUE FOR PRICE CHARGED.

BOSTON FERN.

FERNS.

Undernoted we give a description of a few of the leading varieties of Ferns, but can supply other sorts of merit at low prices.

Adiantum Cuneatum. The popular Maiden Hair Fern......50c to \$1.00 Adiantum Farleyense. This is the finest of all the Maiden Hair varieties..50c to \$2.00

Nephrolepis Bostoniensis (Boston Fern). In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makesitan excellent plant to grow as a single specimen on a table or pedestal..................................50c to \$2.50

We have a few handsome Specimen Plants of Nephrolepis in hanging baskets and pots from \$3.50 to \$5.00 and \$10.00 each.

Nephrolepis Davalloides Furcans. A beautiful and distinct crested variety. The fronds terminating in a branching crest of finely cut and divided growths; a most desirable variety......50c to \$2.00

Pteris Tremula. One of the finest ferns for house decoration, growing very rapidly and throwing up large handsome fronds; makes magnificent specimens; easily grown and very popular

Araucarias, Asparagus Sprengeri, Dracænas and other Plants.

ARAUCARIA ROBUSTA COMPACTA.

SANSEVIERA.

Alocasia Illustris. An excellent plant to grow in con-nection with fancy-leaved Caladiums, or for planting in

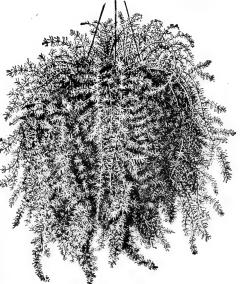

Clerodendron Balfouri. A rapid growing climber of great beauty. It can also be trained in bush form. very profuse bloomer; its bright scarlet flowers are enveloped in a creamy calyx. The trusses or panicles of flowers are upwards of six inches in length, and when trained upon trellises have a rich and elegant appearance 25c to \$1.00 ance..... Cyperus Alternifolius (Umbrella

Dracæna Indivisa. This variety is used

Hardy Hybrid Perpetual.___ ROSES

Hybrid Perpetual Roses are hardy and vigorous. The flowers are very large, of delightful fragrance, and the colors are richer than the Teas or Everblooming.

Anna de Diesbach. Brilliant carmine-pink; large, full and fragrant.

Captain Christy. A lovely rose, blooming almost the entire season; very large, double buds of a deep flesh color.

Dinsmore. A vigorous and free-blooming rose, perfectly hardy and bearing large perfectly double flowers of a rich scarlet-crimson color.

color.

General Jacqueminot. Brilliant scarlet-crimson of fine shape and exquisite fragrance.

exquisite fragrance.

Mabel Morrison. Pure white: large, massive, perfectly formed flowers.

Madame Charles Wood. Vivid crimson, large and full.

Madame Gabriel Luizet. Fine satin rose, large and full.

Magna Charta. Bright pink, suffused with earmine; strong, vigorous

grower

Marshall P. Wilder. Cherry-carmine; large, full semi-globular flowers of fine form.

Mrs. John Laing. Rich, satiny pink, delicious fragrance, blooms constantly.

Paul Neyron. Very large dark rose; by far the largest rose in cultivation. Prince Camille de Rohan. Dark crimson-maroon; richly shaded;

full, large and superb.
Ulrich Brunner. Bright cerise-red; flowers large and full.

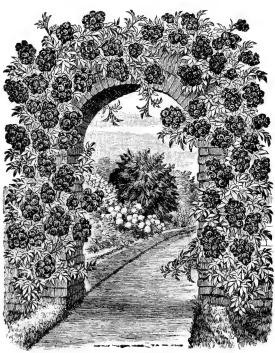

Large Plants, 30c each; \$3.00 per Dozen.

We also have a limited supply of extra large plants that we offer as long as present stock lasts at 50c each; \$5.00 per doz.

MOSS ROSES.

Blanch Moreau. Lovely pure white, large and full. Crested Moss. Rose color, beautifully crested. Perpetual White. One of the finest. Pink Moss. Should be in every collection.

Large Plants, 30c each; \$3.00 per Dozen.

CRIMSON RAMBLER

GEN. JACQUEMINOT.

ROSA RUGOSA.

The lovely Rugosa Roses form sturdy bushes three to five feet in height, covered with handsome, glossy green foliage, and clusters of beautiful single flowers which emit a delightful odor. They bloom nearly the whole summer, and are covered during autumn and winter with red seed pods.

Rugosa. Fine glossy Crimson. | Rugosa Alba. Pure white. Strong Plants, 30c each; \$3.00 per Dozen.

Extra Strong Plants, \$1.00 each; \$10.00 per Dozen.

PERSIAN YELLOW. Perfectly hardy; flowers double and full; deep golden yellow in color; blooms very freely in June. The finest hardy yellow rose grown. Strong Plants, 25c and 50c each; \$2.50 and \$5.00 per Dozen.

HARDY CLIMBING ROSES.

Baltimore Belle. Pale blush, nearly white.

Gem of the Prairie. Large and double; color, light crimson, somewhat blotched white.

Prairie Queen. Deep rose, hardy and desirable.

Michigan Climber. Single variety; flowers nearly two inches in diameter: produced very freely; color, bright rich pink; strong, vigorous grower.

Sweet Briar. Highly prized on account of the delightful fragrance of its leaves and young branches. The flowers are single, bright pink, very desirable for hedges and general garden planting.

Crimson Rambler. The plant is of very vigorous growth, making shoots from eight to ten feet during the season. The flowers are produced in trusses, pyramidal in shape, good specimens measuring nine inches from base to tip, and seven inches across, fairly covering the plant from the ground to the top, so that it is one mass of glowing crimson. The color is superb, and remains strong and vivid to the end. The profusion of bloom is marvelous, over three hundred blooms having been counted on one shoot. shoot.

Pink Rambler. Pure satiny rose. The partially open buds being bright, light carmine, thus producing a strong and pleasing contrast. In hardiness, freedom of bloom and vigorous climbing habit fully equal to Crimson Rambler.

White Rambler. Closely r.sembles the Crimson Rambler in vine and foliage. Large clusters of pure white flowers, which are deliciously fragrant. The flowers remain on the plant a long time (from three to five weeks), and keep a long time when cut.

Yellow Rambler. The flowers are borne in immense clusters, often as many as 150 blossoms in a bunch. The color is a decided yellow, the flowers are very fragrant; the habit of growth is very vigorous. Well established plants often making shoots eight to ten feet in one season.

Large Plants, 30c each; \$3.00 per Dozen. We have some Extra Strong Plants at 50c and \$1.00 each. Large Rose Plants can only be sent by Express, at purchaser's expense.

TEA ROSES.

Tea or Everblooming Roses are quite hardy south of the Ohio River and with careful protection live through our severe northern winters.

American Beauty. Deep rose shaded towards centre a rich carmine-crimson; delicious fragrance.

Strong plants, 35c each; \$3.50 Dozen.

Medium plants, 25c each; \$2.75 Dozen.

Deep brilliant pink. The buds are large, long and pointed. A most desirable sort for garden or winter forcing.

forcing.

Burbank. The freest flowering Rose in cultivation: commences to bloom when only a few inches high. and blooms throughout the season until killed by frost. Color, 37th, pink; strong vigorous grower, perfectly hardy and fragrant. Clothilde Soupert. Pearl white, shaded at the centre with silvery rose; produced in the greatest profusion. It makes a fine plant either for pot culture or outdoor planting.

Dr. Corill. Color, copper yellow. The best and freest flowering yellow Rose; perfectly hardy.

Duchess of Albany. Rich deep pink, exceedingly fragrant; vigorous grower.

vigorous grower. pile **de Lyon.** Deep golden yellow; very large and full buds, strong. vigorous grower; excellent outdoor summerblooming rose.

Large Plants, 25 Cents Each; \$2.75 per Dozen.

Gruss-an-Teplitz. Color, bright scarlet, shading to crimson; fragrant and profuse bloomer. The foliage is beautiful, all the young growth being a bronzy plum color. A queen among scarlet bedders. A perfect mass of crimson-scarlet all summer.

Hermosa. Probably the most popular bedding rose in cultivation. It is of a bright pink color, free flowering and per-

rectly hardy.

Kaiserin Augusta Victoria. Pearly white, lightly tinted with lemon in the centre, remarkably fragrant, a strong, healthy grower with bold, beautiful foliage. The flowers are borne on long stems.

Force Splendid satiny rose: very large, full, fine form,

La France. Splendid satiny rose: very large, full, fine form, a constant bloomer, delicious fragrance.

Marechal Neil. Golden yellow, climbing habit.

vigorous grower.

Perle des Jardins. Beautiful rich yellow, of large size and perfect form.

President Carnot. The flower of the largest size, of exquisite shape; buds long and pointed; color, outer petals, white; centre, delicate flesh pink. Excellent summer blooming

The Bride. Pure white, large size and perfect form, strong grower and free bloomer; delicious fragrance.

Medium Plants, 15 Cents Each; \$1.50 per Dozen.

EXCEPT WHERE NOTED.

Large Rose Plants cannot be sent by Mail.

Medium Sized Plants, 5 Cents Each Extra for Postage.

CHRYSANTHEMUMS.

Autumn Glory. Deep reddish-salmon when first opening, gradually changing to a soft shrimp pink.

Black Hawk. Velvety crimson-maroon, showing no dull color. The darkest red.

Col. D. Appleton. A very large, bright deep yellow, incurved; of fine finish and form

Frank Hardy. A superb pure white variety with immense full deep globular flowers, beguttfully incurved in graceful folds.

George W. Childs. Rich dark velvety crimson, reflex orange. The earliest crimson variety.

George W. Childs. Rich dark velvety crimson, reflex orange. The earliest crimson variety. Glory of the Pacific. The best early pink, dwarf habit; strong stiff stem, and excellent foliage.

Golden Wedding. Rich golden yellow; petals broad and long, double to the centre without an eye, large size.

Ivory. Pure white, a splendid free flowering variety.

Major Bonaffin. Soft clear yellow, incurved, full in the centre; one of the best yellows; a beautiful flower.

Maud Dean. Extra large petals, broad and incurved, perfectly double and of great substance; pink, almost rose.

15 Cents Each:

Merry Christmas. The best late white, having a good stiff stem; flowers of large size and good substance.

Mrs. F. Bergmann. Pure white; a fine large globular flower;

the favorite white, of fine form and substance.

Mrs. H. Robinson. One of the finest white varieties; a perfect ball of snow when fully developed.

Mrs. Jerome Jones. A beautiful waxy white, with broad incurving petals; one of the finest.

Mrs. Perrin. Rose pink; flowers medium size and beautifully

formed; extra fine stem and foliage.

Timothy Eaton. The largest globular Japanese incurved white yet introduced, with strong, stiff stems and splendid

while yet introduced, with stong, status attents and splendid to foliage; was shown at all the principal exhibitions last fall, and was in every case the centre of attraction.

Viviand Morel. Extra large flowers; petals long and loosely arranged; a beautiful shade of pink.

Wm. H. Chadwick. Waxy white occasionally tinted pink; flowers very large. Growth, habit, stem and foliage simply proved. perfect.

15 Cents Each; \$1.50 per Dozen.

Hardy Herbaceous Perennial Plants.

The steadily increasing demand for hardy plants has induced us to give them more attention, and to increase our stock considerably. For such of our customers who are not acquainted with the different varieties we shall be pleased to make suitable selections of the most desirable species, that when once planted, with very little care, will keep the garden gay with flowers from the time frost leaves the ground until late in the autumn.

Antirrhinum (Snap dragon). Assorted colors.

Aquilegia (Columbine). Assorted colors.

Campanula (Canterbury Bells). Assorted colors.

Hollyhocks. The distinctive character and massive beauty of the Hollyhocks render them unrivalled. For distant effect Hollyhocks. The distinctive character and massive beauty of the Hollyhocks render them unrivalled. For distant effect in large groups they are matchless; nothing makes a finer display. They remain in bloom so long and are so effective that few plants equal them for summer blooming.
Iris Kæmpferi. (Japan Iris.) Finest of all the Iris family. The flowers are of immense size, from 6 to 8 inches in diameter, and of the most beautiful and delicate shades. They are perfectly bardy and flower in great profusion during the properties.

are perfectly hardy, and flower in great profusion during June and July.

June and July.

Iris Germanica. (Fleur de lis.) Assorted colors.

Pœonies. Magnificent hardy plants, almost rivaling the Rose in perfume, brilliancy of color and perfection of bloom. They are perfectly hardy, require little or no care, and produce larger and finer blooms when well established. We offer double white, rose and crimson......25c each; \$2.50 doz.

Pœony Tenuifolia fl. pl. A new variety, with foliage like a beautiful fern, and flowers the color and shape of the Jacous print Pose mora double and larger 50 cach; \$3.60 doz.

a heautiful fern, and nowers the color and shape of the Jacqueminot Rose, more double and larger. 50c each; \$5.00 doz.

Phlox Decussata. (Tall Perennial Phlox) One of the best garden plants; they are easily cultivated, and nothing is more attractive than a bed of these, from midsummer until frost. We have a very fine assortment of some of the newer kind. kinds.

kinds.

Pyrethrum Hybridum Fl. Pl. Too much cannot be said in favor of this grand hardy perennial. No class of plants gives a wider range of colors, while the form and substance of the flowers is all that could be wished. The bloom is similar to that of an Aster. The plants we offer are seedlings grown from an extra select strain.

Rudbeckia. (Golden Glow.) One of the most desirable, most effective flowering plants for August and September. It grows six feet high, branching freely and throwing up masses of large double yellow flowers. Invaluable for cutting.

15 Cents Each; \$1.50 per Dozen. Except where noted. If sent by Mail, 20 Cents Each.

ORNAMENTAL FLOWERING SHRUBS.

CLIMBING PLANTS.

Ampelopsis Veitchi.—(Japan Creeper, or Bostón Ivy.)

Ampelopsis Quinquefolia.—(Virginia Creeper.)

A native vine of rapid growth, with large luxuriant foliage, which in the autumn takes on the most gorgeous coloring.

25c each, \$2.50 dozen. By mail, 30c each.

Aristolochia Sipho.—(Dutchman's Pipe.)

ture pipe.....

Bignonia Radicans.—(Trumpet Vine.)

A rapid-growing climber, with large scarlet, trumpet-shaped flowers.......25c each, \$2.50 dozen. By mail, 30c each;

Clematis.

The Clematis is, perhaps, the most popular climbing vine of the day, and is constantly gaining in popularity. Entirely hardy. Duchess of Edinburg. A free flowering double white variety with medium sized flowers. Gipsy Queen. One of the finest of the dark purple varieties. A strong grower and free bloomer. Henryli. Fine, large, creamy white flowers. A strong grower and very hardy; one of the best of the white varieties; a perpetual bloomer.

Dolomer.

Jackmanii. The flowers, when fully expanded, are from four to six inches in diameter; intense violet purple, with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts.

Mad. Ed. Andre. This is the nearest approach to a bright red Clematis and has been called the Crimson Jackmanii. The plant is a strong and vigorous grower and very free in bloom. Color is a very distinct crimson red, a very pleasing shade and entirely distinct from all other varieties.

Miss Bateman. White, with chocolate red anthers.
Seiboldi. Silvery lavender, a most beautiful shade. Strong Plants, 50c each, \$5.00 per doz.; Extra Strong Plants, 75c each, \$8.00 per doz.; by mail, 10c each extra.

Clematis Paniculata.

A beautiful hardy fall-blooming vine. The flowers are pure white, very fragrant, borne in large clusters fairly covering the plant so that it is a mass of fleecy white; the fragrance is delicious. Strong Plants, 30c each, \$3.00 per doz.; by mail, 40c each.

Honeysuckles.

Monthly Fragrant, or Dutch. Blooms all summer.

Common Woodbine. A strong rapid grower, flowers very showy, red outside, buff within. June and July.

Halleana. Nearly evergreen, flowers pure white, produced sbundantly, fragrant like a Jessamine.

Yellow Trumpet. A well-known variety, with yellow trumpet-like flowers.

Scarlet Trumpet. It is a rapid grower and produces scarlet inodorous flowers all summer. \$2.50 per doz. By mail 30c each.

Chinese Wistaria.

Wistaria Sinensis. The favorite variety, producing thousands of pendulous clusters of delicate violet-blue blossoms richly

ORNAMENTAL GRASSES.

Eulalia Gracillima. The most beautiful of all the Eulalias, with narrow graceful foliage, entirely green, without variegation, except that the mid-rib is of a silvery sheen. Perfectly hardy, very valuable. Eulalia Japonica Variegata. Leaves striped white and green longitudinally. The dried blooms of all the Eulalias make beautiful winter ornaments.

Eulalia Zebrina. A peculiarly variegated grass, growing six feet high. The variegation is unlike that of any other plant, being across the leaf in regular bands, dark green and light yellow alternating. Strong Clumps, 25c each, \$2.50 per dozen.

Fruit Trees, Small Fruits, Grape Vines, Etc.

■ ELECT thrifty young trees in preference to old or very large ones; the roots are more tender and fibrous, and they bear transplanting better and are more apt to live; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth. If not prepared to plant when your stock arrives, 'heel in' by digging a trench deep enough to admit all the roots and setting the trees therein, carefully pack the earth about the roots, taking up when required. Never leave the roots exposed to the sun and air.

SENT BY EXPRESS OR FREIGHT AT EXPENSE OF PURCHASER.

APPLES.

STANDARD.

We can furnish all varieties usually catalogued, but the following list comprises the most desirable sort: Three years old, 6 to 7 feet high, 25c each, \$2.50 per dozen.

SUMMMER VARIETIES.

DEWBERRY.

Lucretia. One of the low-growing, trailing blackberries. earliness, size and quality, it equals any of the tall growing sorts. It has proved highly satisfactory wherever tried, and many say it is the best of all the blackberry family.

50c per dozen; \$3.00 per 100.

GOOSEBERRIES.

Plant three to four feet each way, manure well, and after

Fruit Trees, Small Fruits, Etc.—Continued.

GRAPE VINES.

tawba. A very late keeper; red, sweet and rich, with pleasant musky flavor......15c each; \$1.25 doz.

Ives' Seedling. Dark purple, sweet, hardy.
10c each; \$1.00 doz.

Martha (White Concord). Large, pale yellow; strongly resembles the Concord in all points except color. 15c each; \$1.50 doz. Moore's Early. Ripens ten days earlier than Concord : bunch and berry round and large; black, with a heavy blue bloom.

RASPBERRIES.

40c per dozen; \$2.00 per hundred.

The Raspberry should be planted in good, rich soil, in rows five feet apart and three feet apart in the rows. As soon as they have done bearing cut out the old wood to give more vigor to

the young canes.

Brandywine. Large size, light crimson color, good quality and firm; vigorous and productive. One of the best, well-tested, large early berries for the North.

Cuthbert. Large, firm, deep rich crimson, of excellent quality, tall, strong and vigorous, perfectly hardy and very pro-

ductive. Ripens medium to late.

Eureka. Large, black variety, fruit firm, of superior quality, strong, vigorous grower and very prolific.

Golden Queen. Berries large, golden yellow, bright and firm, and of fine, rich flavor; vigorous, productive and healthy.

Gregg. A large black variety, fruit firm, of excellent quality

and a good shipper, udon. The best red, mid-season berry; fruit large, of a beautiful rich, dark crimson color, good quality and marvelous productiveness and hardiness. Will remain on bushes Loudon.

the longest without injury.

STRAWBERRIES.

NY ORDINARY soil will grow strawberries, though the richer it is made the larger the fruit. For garden culture, the most convenient method is to plant in beds four feet wide, three rows in each bed, and plants one foot apart in the row. A pathway two feet wide should be left between the beds, so that the fruit may be easily picked and the bed kept clean without stepping on them. Cover lightly in winter with corn stalks or some coarse litter; rake off in the spring, dress the beds, and mulch with litter or short grass from the lawn. All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens, and are termed pistillate or imperfect-flowering varieties, and must be planted near some perfect-flowering sort, or they will produce little or no fruit. We advise Fall planting for best results.

25c per Dozen; \$1.00 per Hundred; \$7.50 per Thousand.

Brandywine. Large, roundish conical; bright, glossy crimson; berries, firm and solid, excellent quality and fine flavor.

Bubach No. 5 (P). Very large and productive, bright scarlet; a fine market variety; early to medium.

Enhance. Large, bright crimson, firm, very prolific.

Gandy. Large, bright crimson, berries of uniform size; plants vigorous and healthy. The best late variety.

Greenville (P). Large, roundish berries of excellent quality; firm and good shipper; very productive.

Haverland (P). Large, bright red, excellent flavor; vigorous grower; ripens fruit evenly and early.

Jessie. Large, handsome berry, of good quality; vigorous

grower; good market sort.

Marshall. Large, rich crimson, fine flavor. Plant very strong; with high culture produces heavy crops.

Oriole (P). Large, deep red, rich aromatic flavor, firm, and a good shipper; extra early; productive.

Parker Earle. Large, rich crimson, conical shape, excellent

shipper; strong, vigorous grower; very productive; late variety

Wm. Belt. Large, brilliant red, extra fine quality. The plant is vigorous and thrifty, and very productive.

GRASS AND CLOVER SEEDS.

We have for years made a specialty of Grass and Clover Seeds, and our aim has always been to furnish the best qualities, procured directly for us by our representatives at the most reliable sources of supply now known.

Our facilities for re-cleaning are unsurpassed, having the most improved machinery, made expressly for our use.

We are pleased to announce that considerable of this season's crop of Clover and Grass Seeds is of superior quality and as usual we have secured ample stocks of High Grade Seeds of Unexcelled Purity and Strong Germination, which places us in position to meet reliable competition from any source.

We shall always be pleased to mail samples for comparison.

Our prices are always as low, quality considered as any house in the trade.

All orders with cash filled at lowest market prices on day of receipt. Where no prices are given, market rates will be charged, or special prices will be quoted on application.

We are not only sellers of seeds, but are the largest buyers in this section, and will always pay the highest market prices, quality considered.

Owing to the varying bulk of Grass Seeds from season to season (owing to climatic conditions which can not be controlled), they are always put up by us by weight and not by measure, thereby securing to our customers the amount they pay for, as prices are based on weight and not on bulk. The number of pounds to the bushel, in brackets, is the old way of offering grasses, and is mentioned merely for reference. Two-bushel seamless bags at 15 cents each.

ADD TEN CENTS PER POUND EXTRA IF SENT BY MAIL.

Awnless Brome Grass. (Bromus Inermis.) A hardy perennial, standing extremes of heat, cold, and drought better than any other of our cultivated grasses. It has been found to do well in the North-west and Canada. In the South it remains green all winter. It grows with wonderful rapidity, and produces heavy hay crops and luxuriant pasture. It will grow well on all kinds of soil, even on yellow sand, although of course, on this it does not produce so abundantly, but even under these less favorable conditions it gives a very large yield. All kinds of stock eat it greedily, and the analysis made show that it is exceedingly rich in flesh forming ingredients. The seed shouldbe sown as early in the Spring as the ground can be worked. (10 lbs. per bushel.) Sow 35 to 40 pounds to the acre.

Bermuda Grass. (Cynodon Dactylon.) A valuable grass for the South and for tropical climates. It will not endure frost. Sow 6 to 8 lbs per acre.

Creeping Bent. (Agrostis Stolonifera.) A variety of English Bent. Valuable in mixture with other grasses for lawns, etc. Suitable also for moist localities. (12 lbs. per bushel.) Sow 30 lbs. per acre.

Crested Dogstail. (Cynosurus Cristatus.) Perennial. Height. It oly feet. An excellent grass for hard dry soils; valuable for pastures and lawns, as it is very hardy and but little affected by extremes of weather. Sheep fed in pastures where this abounds are less subject to foot rot. It is tender and nutritious and relished by all sock. (21 lbs. per bushel.) Sow 20 lbs. per acre.

Fowl Mendow. (Poa Serotina.) A valuable grass for wet meadows, where it will produce large crops of excellent hay after it has become well established. It thrives on such lands as are occasionally overflowed, but will not endure to remain under water for a long period, especially in hot weather. (10 lbs. per bushel.) Sow 20 lbs. per acre.

Solb, \$2.25 for 10 lbs., \$2.00 per 100 lbs.

Italian Rye Grass. (Sorghum Halapense). A perennial; a rapid grower, and on started and an obstance. A still snot per acre, and long canel

Meadow Fescue Grass.

other grasses continue to shoot up nower states throughout son. Kentucky Blue Grass also makes hay of excellent quality, but the yield for this purpose is not equal to some other grasses. Sow (if alone) 40 lbs. per acre; weight per bushel, 14 lbs. Price, Fancy Clean Seed, 15c lb., \$1.20 for 10 lbs. \$10.00 per 100 lbs., Extra Clean Seed, 10c lb., 70c for 10 lbs.

Hard Fescue. (Festuca Duriuscula). Perennial height, 12 to 24 in-

Hard Fescue. (Festuca Duriuscula). Perennial height, 12 to 24 inches. Thrives well in dry situations, where many other grasses would fail, thus making it a desirable pasture variety. The common name solely applies to the flower heads, which when ripe, become hard: the herbage, however, is decidedly tender. Sow, if alone. 30 lbs. per acre. Weight, 12 lbs. per bushel...........20c lb., \$1.80 for 10 lbs. Meadow Fescue. (Festuca Pratensis). (Erroneously called English Blue Grass). A highly valuable species for permanent grass land. It does not, however, attain its full productive power till the second or third year, when it far exceeds most other sorts in quantity of its produce and nutritive matter. It is relished by live stock, both in hay and pasture, and is one of the most desirable permanent grasses for general culture. 40 lbs. to the acre. Weight 24 lbs. grasses for general culture. 40 lbs. to the acre. Weight 24 lbs per bushel 2001b, \$1.85 for 10 lbs

Meadow Soft Grass (Holcus Lanatus). Inferior to many other sorts

but of easy culture, and accommodates itself to all descriptions of soils, producing a fair crop under unfavorable circumstances. Sow 25 lbs. to the acre. Weight. 7 lbs. per bushel. 15c lb., \$1.25 for 10 lbs.

Rhode Island Bent. (Agrostis Canina.) A fine and very permanent grass, chiefly used for pastures and lawns, for which it is one of the best. (12 lbs. per bushel). Sow 40 lbs. per acre.

20c lb., \$1.75 per 10 lbs., \$1.5.00 per 100 lbs.

NOTE.—We are prepared to make up Special Mixtures of Grass Seeds for particular purposes—situations or conditions; correspondence regarding such will receive prompt attention. Prices subject to market changes. We will be pleased to send samples and quote lowest market prices

GRASS AND CLOVER SEEDS.—Continued.

Meadow Foxtail Grass.

Meadow Foxtail (Alopecurus pratensis). Perennial, height 2 to 3 feet. Resembles Timothy, but flowers much earlier, and it is particularly valflowers much earlier, and it is particularly valuable as a permanent pasture grass, being of very early and rapid growth. It is highly relished by stock; endures a close cropping, and forms a luxuriant aftermath, and quickly revives after a long drought. Sow, if alone, 25 lbs. per acre. Weight, about seven pounds per bushel.

25c per lb., \$2.25 for 10 lbs.

Orchard Grass (Dactylis Glomerata, Rough Cocksfoot). Perennial, height three feet. It blossoms about the same time as Red Clover, making it, on that account, a desirable mixture with that plant. It is exceedingly palatable to stock of all

on that account, a desirable mixture with maplant. It is exceedingly palatable to stock of all kinds, and its powers of enduring the cropping of cattle commend it as one of the very best pacture crasses. Sow 35 lbs. to the acre. Weight,

rich soil, in which it attains a height of 2 to 2 feet. Sow, if alone, 45 lbs. per acre. Weight, 1 feet. Sow, if alone, 45 lbs. per acre. Weight, 14 lbs. per bu...10c lb., 80c for 10 lbs., \$7.00 per 100 lbs.

Fancy Pure Seed. Weight about 32 lbs. per by 11 lbs. 12 lbs. per by 11 lbs. 12 lbs. per by 12 lbs. 12 lbs. per $\frac{2}{14}^{2}$

bushel. Sow 10 to 12 lbs per acre-15clb., \$1.25 for 10 lbs., \$11.00 per 100 lbs.

Perennial, or English Rye Grass (Lolium perenne, Rye Grass, Imported English Blue Grass). Height, 15 to 24 inches. This grass is considered invaluable for permanent pastures. th produces an abundance of remarkably fine foliage, tillers out close to the ground, and soon forms a compact sward. After being cut it grows up in a very short time, and remains bright and green throughout the season; it consequently, is well adapted for lawn mix-tures. It is also a good variety for hay, if cut when in blossom, as it is then most nutrittous. Sow, if alone, 65 lbs. per acre. Weight, 24 lbs. per bushel...10c lb., 80c for 10 lbs., \$7.00 per 100 lbs.

Orchard Grass.

grasses, it is valuable on account of its vernal growth, and also for continuing to throw up root foliage until late in the autumn. Its chief merit is its fragrant odor, which the leaves emit when partially dried, thus sweetening hay. Sow 3 to 5 lbs. per acre with other grasses.

70c lb., \$6.50 for 10 lbs. Sweet Vernal Grass, Annual (Anthoxanthum odoratum puelli). Much smaller than the peren-

Sheep's Fescue (Festuca ovina). Perennial, height varies from six to twenty inches. This grass

Fine-Leaved Sheep's Fescue. (Festuca ovina tenuifolia). Perennial, height varies from 8 to 24 inches. This is similar to the Sheep's Fescue mentioned above, except that the leaves are much finer. It is very suitable for permanent pasture, especially on uplands and dry soils. Its rich dark green gives a fine appearance to hay, and renders it also valuable for lawn mixtures for dry situations. Sow, if alone, 40 lbs. per acre. Weight, about fourteen pounds per bushel...... 35c lb., \$3.00 for 10 lbs.

Tall Meadow Oat Grass (Avena Elatoir). This is a perennial grass, has broad, flat leaves, and grows about three feet high; has an abundance of long fibrous roots, penetrating deeply in the soil, enabling it to withstand drought and cold. 25 to 30 lbs. per acre.

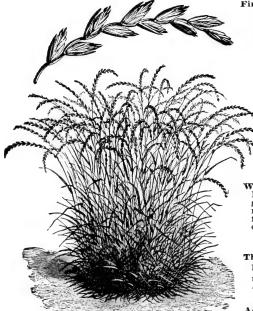

25 to 30 lbs. per acre.
20clb. \$1.65 for 10 lbs.
Timothy (Phleum Pratense, Herd's
Grass, Cat's-tail Grass). This grass
stands at the head for meadows.
Never use less than one peck to the
acre, then up to one-half bushel, as to imothy circumstances...... Market price.

Wood Meadow Grass (Poa memoralis). No grass is better adapted for pleasure grounds, particularly under trees, as it will not only grow in such places, but forms a fine sward where few other grasses can exist. Sow 25 pounds to the acre.

40c lb., \$3.50 for 10 lbs.

The prices quoted are subject to market fluctuations. Customers when in need of large quantities, send list of wants for lowest market prices.

Add Ten Cents Per Pound Extra if Sent by Mail.

Perennial Rye Grass.

Tall Meadow Grass.

MIXED GRASSES For Special Purposes.

Under this head we are prepared to furnish seeds adapted to all soils and all situations and for all purposes, composed of grasses for light soils, for medium soils and for heavy soils; by light soils we mean that which is more or less of a sandy or gravelly nature; the neavy, clay and heavy loams; while the medium is an intermediate between these two. A light, wet soil, with respect to the grasses suited to it, may be considered same as to the heavy soils, and a dry, heavy soil more as the light soils.

Our best mixture is made entirely with our choice recleaned seeds, while in our second quality we use the same seeds, but without recleaning, and will betequal to the qualities usually to be had on the market. Our mixtures will all have a uniform weight of sixteen pounds to the bushel. Quantity to be used per acre, one and one-half to two bushels, and half this quantity for renovating. In ordering always state the soil and position on which you wish to use it.

renovating	, In ordering always state the soil and position on whi	ch you wish to use it.

farmer.....00c peck, \$1.50 bushel.

Northern or Western Grown Millet 35c peck, \$1.15 bushel.

Hungarian Grass. This grass resembles the millet, it is of fine growth, and makes an excellent hay......30c peck, \$1.00 bushel.

CLOVER SEEDS.

Alsike, or Swedish. (Trifolium Hybridum) An excellent variety of luxuriant growth, and very sweet; valuable for pasturage or ensilage. Sow 6 to 8 lbs. per acre.

200 lb., \$1.60 for 10 lbs., \$14.00 for 100 lbs.

Alfalfa, or Lucerne. (Medicago Sativa.) One of the best varieties, succeeding in almost every situation. Will bear cutting three or four times during the season. For bringing up poor land it is the best of the clovers, as it not only produces large masses of foliage, but forces its roots down fully three feet into the earth. Sow in the spring to secure a good stand before winter. If to be used for pasturage or curing, sow 15 to 20 lbs. per acre.

15c lb., \$1.25 for 10 lbs., \$10.00 per 100 lbs.

Bokhara Clover. (Melilotus Alba.) A rapid-growing, white-flowered sort; a good bee food. Sow 10 to 15 lbs. per acre20c lb.

This illustration demonstrates the difference in growth between the Southern Grown Ger-man Millet Seed and that grown in Northern or Western States or Western States.

Yellow Trefoil or Hop Clover. (Medicago Lupulina). Is an excellent fodder plant, mixed with other Clovers or Grasses, but should not be used alone. Sow 10 to 12 1bs. per acre...20c1b., \$1.40 for 10 lbs.

The prices quoted are subject to market fluctuations. Customers when in need of large quantites, send list of wants for lowest market prices.

Add Ten Cents per Pound Extra if Sent by Mail.

One-third natural size.

Farm, Field, Forage and Silo Seeds.

We give special attention to the quality of all our Farm Seeds, and send out only recleaned stock. It is our aim to send out absolutely pure stock, true to name. For green manures, we recommend sowing thickly, Scarlet Clover, Sugar Cane, Tares, Field Peas, Rye and Oats, and plowing under when six to eight inches high.

Owing to market fluctuation, impossible to quote prices. When in need, state quantity, and we will be pleased to send samples and quote lowest market prices.

Add ten cents per pound extra if sent by mail.

SOUTHERN COW PEAS.

The Great Land Renovator.

Their value as a fertilizing crop exceeds that of clover, for in addition to being a larger Nitrogen gatherer than clover, they draw from the subsoil to the surface large amounts of both Potash and Phosphoric acid, thus putting the soil in most excellent condition for following crops.

The feeding value of Cow Peas, either green fed as hay, or preserved as ensilage is very high, being considerably above that of Red Clover.

The yield of green vines per acre runs ordinarily from five to fitteen tons. The Rhode Island Experiment Station reporting one season seventeen and a half tons, equivalent to 3½ tons of dried hay.

The yield of peas vary according to varieties, condition of soil, etc., from ten to thirty bushels per acre.

Cow Peas like all other crops thrive best on good ground. The maximum result being obtained from dry sandy loam, but from their strong growth of roots will do well on almost any soil not too wet.

Sow 1½ to 1½ bushels per acre, on land thoroughly pulverized, and disk or plow with a cultivator or double shovel plow. If wanted for hay, cut when peas are forming, cure as clover. If peas are for fertilizer, sow same quantity aftersame preparation as for hay, turn under when peas are in bloom. If farmers will first roll and disk peas, they will turn under much easier and be more satisfactory. For a fertilizer, especially to be followed by wheat or corn, they are simply the best. Bear in mind that the Southern Cow Pea belongs to the Bean family, therefore must not be sown until the ground is thoroughly warm and all danger from frost is past.

- **Black.** Matures quickly, best variety for the extreme porthern sections of the country, gives a large yield of vines and peas. Seed large.
- Black Eye. Similar to the Black as to yield of vines and peas, generally more prolific, requires a little longer season to mature
- Whip-poor-Will. An early variety, tall, upright, medium yield of vines, large yield of peas for which they are particularly grown. Highly recommended for "hogging down."
- Clay. The leading variety in the South. Large yield of vines and peas, but requires longer season to mature than the former named varieties. Fine for summer pasture or green feeding, or to turn under green for soiling.
- Mixed Cow Peas. These are splendidly adapted for those who merely wish same for feeding purposes, and, being mixed, we are able to offer them at a much lower price.
- Soja Bean. This valuable forage plant has attracted increasing attention yearly. It is one of the most nutritious of all vegetable products. It will produce a crop of twenty to thirty bushels peracre, and is as easily grown as other beans. For pasturing or feeding as green fodder it is very valuable, and nearly equal to clover for fertilizing. The dry beans when ground make an excellent meal for feeding to milch cows. When roasted and ground they form an excellent substitute for coffee. Sow half a bushel per acre broadcast, or plant in drills three feet apart, and one to one-and-a half feet between the plants, dropping two or three bears in each hill, which will require one gallon per acre.
- Canada Field Peas. For fodder, in mixture with oats, sow at the rate of two bushels each per acre, or sown alone at the rate of three bushels per acre for plowing under. Used as feed for pigeons.

VETCHES.

- Vetches—Spring Tares. (Vicia sativa.) Sown broadcast at rate of 1 to 1½ bushels to the acre, like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for poas.
- Sand, Winter or Hairy Vetch. (Vicia villosa.) Thrives on poor, arid, sandy soils. Is sown either in fall or spring, and generally mixed with rye as a support to the plants. Grows to a height of from three to four feet, and can be cut twice for fodder, first as soon as the bloom appears, and then it can be again cut for the seed. The plant is perfectly hardy, and the produce is recommended as most nutritious. Should be sown at the rate of 1½ bushels to the acre.

- Kaffir Corn. Produces two to four heads from a single stalk.
 Stands drought wonderfully, and yields paying crops of
 grain or forage, even in dry seasons when corn has utterly
 failed. The whole stalk, as well as blades makes excellent
 fodder, and all stock eat it greedily. Sow in rows three feet
 apart, five pounds per acre; broadcast, 15 pounds per acre.
- wild Rice. (Zizania aquatica.) Valuable as a forage plant on inundated lands and along the shores of marshes. As an attraction for wild fowls it is invaluable. The seed should be sown in the fall in six inches to six feet of water, having soft mud bottoms where there are few weeds.
- Teosinte. (Reana Luxurians.) The stalk can be cut several times during the season. Should not be planted until the soil is perfectly warm in spring. Requires about four pounds of seed per acre.
- Dwarf Essex Rape. A forage plant of highest value. It can be sown in April for an early crop, and for fall crop in July, August and September, and still later further south. It is sown broadcast, 6 lbs. to the acre, but is better drilled, in which case 3 lbs. to the acre will suffice. In a few weeks from the time of sowing, sheep, hogs or cattle can be turned on it; all reports agree that they gain weight faster on this than on any other fodder, as it can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen, Dairymen and Farmers have proved its value.

OATS

Broadcast two to three bushels to the acre.

- White Bonanza. One of the earliest and best Winter Oats; very prolific.
- Red Rust-Proof. These are the standard oats of the Southern States, yielding large crops when all other soris were destroyed by rust. It is a large, heavy, reddish looking berry, very prolific.

White, Black, also Mixed.

BUCKWHEAT.

Should be sown about the middle of June, broadcast, using from three-quarters to one bushel to the acre.

- Japanese. This new sort has proven to be much earlier and more productive than any other variety. The grains are very large and of a rich brown color. It excels all in yield and earliness.
- Silver Hull. A very good and popular variety. The grain is of a light gray color, is rounder than the common variety, has a much thinner husk, matures earlier, and yields a half more to the acre.

SORGHUM, OR SUGAR CANE.

Plant in drills three quarters to one bushel; broadcast, 1 to $1\frac{1}{2}$ bushels to the acre.

Sorghum is being used extensively as a green food for cattle, horses and mules; it is a sure crop, being a great drought resister and an immense yielder, producing many tons of most nutritious green food to the acre. Specially fine for food for milch cows when pasture is short.

- Early Orange Cane. A strong grower; much more juicy than any other variety. The stalk is heavier, and a little later than the Amber.
- Early Amber Cane. This popular and well-known variety is the earliest, and makes the finest quality of both sugar and syrup.

BROOM CORN.

Plant eight to ten quarts to the acre.

Improved Evergreen. The best for general cultivation; brush firm, of good length, and bright green color.

- Dwarf. Grows from three to four feet high, with straight, smooth brush.
- California Golden. A strong growing variety, much resembling the Evergreen, but longer brush, and a bright golden color when ripe.

SELECTED SEED POTATOES.

(Kartoffel, Ger.)

We select our Seed Potatoes in the best northern districts and expressly for seed purposes. As prices are liable to vary, we shall be pleased to give quotations on application. They are put up in barrels of about 23/4 bushels each.

Early Ohio. A seedling of the Early Rose, a week earlier, of excellent quality. Tubers round and oblong in shape; flesh solid; cooks dry and mealy.

Early Rose. The leading variety for earliness and productive-

Beauty of Hebron. Ripens with the Early Rose, and equally as valuable as a market variety.

Burbank's. A white-skinned, medium early variety, with few eyes; flesh fine grained and of excellent flavor; producing a large crop of marketable potatoes.

Chicago Market. Very popular, early, good quality, and yields well.

White Star. Medium early, a very large cropper, fine, floury texture and delicious flavor, being unexcelled by any other variety.

Late Beauty of Hebron. Remarkably productive, tubers oblong and of extra size; skin and flesh white; table properties good, and keeps well.

White Elephant. Late, large, enormously productive, and of excellent flavor; splendid keeping qualities.

SPRING WHEAT AND BARLEY.

Owing to market fluctuations, will quote prices on application, stating quantity wanted.

FIELD CORN SEE 18.

Hemp Seed. We are large handlers of Domestic Hemp Seed and will be pleased to quote market prices upon application. Sow at rate of three quarters to one bushel per acre.

Seeds of ROOT CROPS for Stock.

MANGEL. WURZEL.

Five to Six Pounds of Seed Required Per Acre.

The importance of this crop for stock can not be over-estimated. The results from their use are wonderful, as shown in the improved health and condition of animals, the increased yield of milk, and the saving of hay. Can be raised at a trifling cost, and yield immense crops if the soil is rich. They make a heavy growth; the rows should be at least two feet apart.

Golden Tankard. Bright yellow, large, handsome, heavy cropper, splendid quality.......15c ¼ lb., 30c lb., \$2.25 for 10 lbs.

SUGAR BEET.

Are not as heavy yielders as Mangels, but superior quality, containing a large amount of saccharine matter; thousands of acres are planted with Sugar Beets for manufacturing sugar. Excellent for feeding cows, improving quantity and quality of milk. Vilmorin's Improved. A medium sized white Sugar Beet brought by the most careful selection to the highest perfection, both

CARROTS.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

FERTILIZERS.

SUBURBAN LAWN FERTILIZER

Is clean, free from any disagreeable odor, and does not contain weed seeds. Especially prepared for use upon lawns, and contains all the constituents for promoting a quick luxuriant growth, and a rich green color. When making a new lawn apply from 300 to 400 lbs. per acre, raking well into the soil.

ANALYSIS.

Ammonia		
Available Phosphoric Acid		
Insoluble Phosphoric Acid	0.30	6.6
Total Phosphoric Acid	2 01	4.6
Potash (k 2 o)		4.6

As will be seen from the above analysis we offer a fertilizer specially adapted for lawns, being rich in Ammonia or Nitrogen, and Potash, which will produce a luxuriant growth of the young grass and maintain and nourish the lawn throughout the season. Per lb., 10c; 6 lbs., 25c; 13 lbs., 50e; 25 lbs., 75c; 100 lbs.,

SHEEP MANURE—El Paso.

\$2.50; per ton, \$40.00.

This is a pure natural manure, and a nutritious food for plants. Its effect is immediate, much more lasting and beneficial than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effects. Nothing equals it for general use on flower beds, or for the vegetable garden. No raking-off required. No seeds of foul weeds in it! No offensive odor! It is clean to handle! Absolutely safe to use in any quantity or in any manner.

Directions .- For lawns, use at the rate of from 300 to 500 pounds per acre. For pot plants, mix one part of sheep manure to six parts of soil. For use in the vegetable garden, spread over the surface and dig in. Being soluble, it readily makes a safe liquid manure (one pound to five gallons of water per day can be safely used.)

Pulverized, per lb., 10c; 5 lbs., 25c; 12 lbs., 50c; 25 lbs., 75c; 100 lbs., \$2.50,

Natural state, not pulverized, \$1.75 per 100 lbs.

BOWKER'S FLOWER FOOD.

It is free from odor, clean to handle, and, in addition to promoting a strong, healthy growth, and a profusion of bloom, it materially aids in keeping your plants free from vermin. The Flower Food will keep any length of time, is soluble in water and ready for the plant to take it up, thus producing a quicker and healthier growth than can be obtained from any other fertilizer. This is splendidly adapted for Palms, Rubber Plants and Ferns.

Directions for use on each package.

Large size, 25c per pkt. By mail 16c pkt. extra. Small size, 15c per pkt,; 2 pkts. for 25c. If by mail, add 8c pkt. extra.

AMMONIATED BONE MEAL and POTASH.

This is now the leading fertilizer, and is especially valuable for plants, potatoes and grain.

ANALYSIS.

Nitrogen	2.47	to	3.29
Ammonia	3.	6.6	4.
Total Phosphoric Acid	8.	4 6	10.
Available Phosphoric Acid	6.	6 6	8.
Water Soluble Phosphoric Acid	4.	6.6	6.
Potash (k 2 o)	2.	6.6	3.

25c; 100 lbs., \$2.00; 200 lb. bag, \$3.00; half ton, \$13.50; per ton, \$25.00.

PERUVIAN GUANO.

One of the most powerful stimulants for plants and growing crops. One pound of Guano to twenty gallons of water will be sufficiently strong for a single watering each week, and more efficient than repeated waterings with weaker solutions.

Per lb., 10c; 2 lbs., 20c; 5 lbs., 40c; 10 lbs., 75c; 100 lbs., \$5.00.

BONE, FLOUR OR DUST.

This is ground very fine, decomposes more rapidly in the soil than the coarser grades, and is therefore more quickly beneficial.......Per lb., 5c; 10 lbs., 45c; 100 lbs., \$3.00.

BONE, CRUSHED OR COARSE.

This is largely used for pasture lands, being rather slow but permaneut in action, and it is also indispensable in the grape-vine borders—for fruit trees, small fruits, etc.—where a lasting fertilizer is required.

Per lb., 5c; 10 lbs., 45c; 100 lbs., \$3.00.

PACIFIC GUANO.

For several years we have been handling Pacific Guano, and the universal verdict from all who use it is, "It is the best fer-tilizer we have ever used."

Per lb., 10c; 5 lbs., 25c; 25 lbs., 75c; 100 lbs., \$2.00; per bbl. of 250 lbs., \$3.75; per half ton, \$14.50; per ton, \$26,00

COTTON SEED MEAL.

This makes an excellent fertilizer for old lawns and meadows, being odorless and free from weed seeds. Apply at the rate of 200 lbs. per acre.

Per bag of 100 lbs., \$1.50; per ton, \$26.00.

LAND PLASTER

Is adapted to a great variety of uses, and sales are largely increasing as its value becomes better known. If applied as a top-dressing for Grass and Clover crops in the spring, it greatly top-dressing for Grass and Clover crops in the spring, it greatly increases the growth and yield of same, in fact its use is almost certain to insure a good stand of clover. If it is sprinkled in Stables, Poultry Houses and on manure piles it will prevent ammonia from vaporizing, thereby greatly increasing the value of farm manure. On account of its economical usefulness and of farm manure. On account of its economical useful effectiveness it should be liberally used on every farm.

Per barrel, about 275 lbs., \$1.35; six barrels or more, \$1.25 per barrel.

FERTILIZER INGREDIENTS.

For the benefit of those who want Fertilizers for special purposes, or for mixing with stable manure, we keep on sale ingredients that contain the elements to make complete fertilizers, viz: Nitrogen, Potash and Phosphoric Acid. The ingredients we sell contain these elements in most available form for plant food.

Nitrate of Soda. A natural product of the mines of Chili, South America. Contains sixteen per cent. Nitrogen, equal to twenty

Kainit. A natural product of the mines of Germany, containing nearly thirteen per cent. pure Potash, also a large percentage of Magnesia, Sulphate of Lime and Salt. Mixed with stable manure, 1% pounds per day for each animal will double the value of the manure, by preventing the waste of Nitrogen-Ammonia. Use 200 lbs. per acre. Kainit is put up in 200-lb. bags only.

Price per bag, \$2.25; 5 bags or more, \$2.00 per bag, or \$19.00 per ton.

Mineral Phosphate. A highly concentrated phosphate, made from the deposits of the bones of sea animals. Contains from

Briefly stated, the leading effects of the different fertilizer elements are as follows: Nitrogen (Ammonia) produces a vigorous growth of the plant, and is particularly valuable for all vegetable crops, and as a top dressing for grass. Potash and Phosphoric Acid increase the yield and quality of crop products, and should be used on all grain crops.

INSECTICIDES AND FUNGICIDES

Nicoticide Fumigator and Lamp.

tt cheaper than any other preparation.

Per lb., 5c; 10 lbs., 30c; 100 lbs., \$2.00; barrel of 300 lbs., \$4.50.

Nicoticide Fumigating Compound.

Sphagnum Moss. For packing and growing orchids, etc. Per pound, 10c; per bale, \$1.25

COMPOUND.

Anti-Grub Compound. Our attention has repeatedly been Anti-Grub Compound. Our attention has repeatedly been called to the fact that during the summer time large patches of our lawns die out without any apparent cause, and upon close and careful investigation we have found that this was largely caused by the Old White Grubs which destroy the young roots and shoots of the grass, with the result that the grass dies, and at the same time they exhaust the soil. To remedy this evil we have the same time they exhaust the soil. To remedy this evil we have placed on the market a combination of chemicals that are intended to destroy the Grubs and also supplying a fertilizer calculated to cure sour land and prevent the growth of Moss and Fungii and supplying all necessary ingredients to produce a luxuriant growth of grass. This mixture has been largely used on our Cemeteries, Parks and Lawns this season with most gratifying results. Apply at rate of 200 to 300 lbs. per acre.

50 lbs., \$1.50; 100 lbs., \$2.50.

LAWN SWINGS.

NORWOOD TWO=PASSENGER LAWN SWINGS

The most desirable lawn swing in the market. The seats are Ine most desirable lawn swing in the market. The seats are large and roomy, so that when they are occupied by two large, long people they are in no manner crowded. The seats have a great range of adjustment. An extra rod (not shown) is placed in the swing bars between the seat and foot rest, so that the foot in the swing bars between the seat and total seat to small chil-rest can be raised to adapt the height of the seat to small chil-Price, \$5.00.

NORWOOD FOUR=PASSENGER LAWN SWINGS

Moss Green, Sheet..... Per bale, 40c

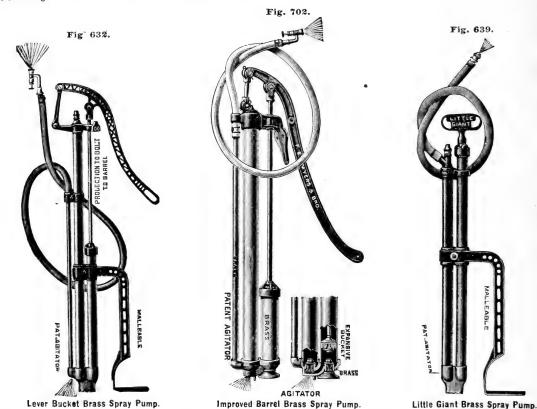

SPRAY PUMPS.

HESE spray pumps are constructed entirely of brass, a material that is not affected by the poisonous arsenites used in different formulas for spraying fruit trees, vines and shrubbery. They are so arranged that the labor of pumping is all done on the downward stroke of the piston and nothing on the up. The effect of this operation while pumping is to hold the pump down. The foot rest steadies the pump, holding it in proper position.

They are provided with a large air chamber, and have ball valves; the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a continuous spray, and is not affected by the movement of the plunger. The operator is enabled to keep a constant pressure on the nozzle of from 50 to 100 lbs, with very ordinary exertion. Will throw a solid stream 50 feet, and are of unusual value for washing windows, buggies, and extinguishing fires, sprinkling lawns, flowers, etc. For spraying are arranged so as to discharge a fine jet in the bottom of the bucket to keep the solution thoroughly mixed and agitated, a feature peculiar to these pumps only, and a very necessary feature to a spray pump. The pumps are also provided with a sprinkler for flowers.

We advise spraying on clear bright days during Winter and early Series between the solution to the pumps are also provided with a sprinkler for flowers.

We advise spraying on clear, bright days during Winter and early Spring, because a stronger solution can be used while trees are dormant, and the San Jose Scale and all other insects can be destroyed more readily than can be done when trees

These Pumps can be used for white-washing to good advantage. When used for this purpose, we advise using the Bordeaux Nozzle. Price, 50c each extra.

PIPE EXTENSIONS.

This article seems to be so generally misunderstood that we wish to call particular attention to it. You will readily understand that a fine mist spray cannot be thrown over twelve to fifteen feet, and it is positively necessary that an 8 foot pipe extension be used with each spray pump. By this means the water is carried solid to a distance of ten feet and sprayed from that point, which enables the user to reach the highest tree.

In addition to the above we handle several other styles of Spray Pumps, including Hydraulic Spray Pumps, Double Acting Barrel Spray Pumps, etc. Send for our Special Catalogue.

SPRAYING PUMPS. Etc. durable and attractive. The Double Tube Sprayer covers a radius of 21/2 which is very durable and will not rust. LENOX KNAPSACK

Double Tube Lightning Insect Sprayer No. 20.

No. 20 Sprayer has detachable glass reservoir provided with our patent spring leather plunger expander, which at all times keeps the leather washer expanded and will

at all times keeps the leather washer expanded and will not allow it to wrinkle or dry up, which is the case in former sprayers. The only sprayer having a glass reservoir, detachable, encased so that the operator at all times can see the ingredients mixing, and just how they are working. Also having a glass reservoir, which is made of the pattern of a Mason fruit jar, and any such will fit this sprayer; being oblong, gives a churning motion while the sprayer is being used, mixing the ingredients—which cannot be done with any other shaped sprayer—and will not allow Paris Green to settle. The glass sprayer will not corrode or rust out, as is the case with metal. as is the case with metal.

The screw cap of this sprayer is made of heavy zinc, and the air chamber

and jackets are made of heavy tin, nicely painted a bright red, making it very

The Double Tube Lightning Insect Exterminator is double the capacity of any other sprayer made, covering a radius of 2½ feet, producing two large sprays with one operation. The reservoir filled with water and a teaspoonful of Paris Green is sufficient to kill 2,000 hills of potato bugs......Price, 75c each.

Double Tube Lightning Insect Sprayer No. 10.

feet, producing two large sprays with one operation; provided with our patent spring leather plunger expander. The reservoir is made of galvanized iron,

Price, 50c each.

For Garden, Field, Grape and Small Fruit Culture. One man does the work of twelve, and need not stoop down. Spray

one man does line work of twelve, and need no solve does not start as you walk. No waste whatever. Spray stops by releasing the pressure of the thumb. No machinery to get out of order. Has an agitator on the left side to stir the liquid.

Never rusts. Never out of order. Adjustable to man or boy. To spray trees and vines turn nozzle up. We recommend it to be the best and cheapest one on the market. Price, \$3.00 each. Extra Tube. Rubber bulb and rose to work with both hands, \$1.50. Rubber

Bulbs, 25c each.

LADIES' FAVORITE SPRAY.

It throws a beautiful misty spray; fine for window gardening and flowers in the house. Sprays downward or upward, getting on the under side of the leaves. Excellent for tobacco and cigar manufacturers where they need a fine spray.....Price, 90c.

The "New Era Sprayer" is too well known to need extensive description. This sprayer embodies the principles of the ordinary atomizer, and is new only in the application of same to a new use. It is economical, not only because of its low price, but because of its great saving of material. For small uses, where labor is not a consideration, the "New Era Sprayer" will be found effective and useful. Before the advent of the "Auto Spray" the "New Era" was superior to any other device for small fruits and vines, and we have sold as high as thirty thousand in one season. as thirty thousand in one season.

LAWN MOWERS.

Victory Lawn Mower.

GENUINE PHILADELPHIA LAWN MOWER.

The Philadelphia Lawn Mower has stood the test for years, and is still acknowledged to be one of the best and a strictly High Grade

Mower.

Style K.-5 blades, 10-inch wheel, 6½-inch cylinder. Single Pinion, geared on both sides. The greatest diameter of cylinder, and with with five blades, insures fine cut, and with

tts large driving wheels, is light running.

14 in., \$6.00; 16 in., \$6.60;

18 in., \$7.25; 20 in., \$8.25.

Style C.—4 blades, 8½-inch wheel, 5½-inch cylinder. This style medium high wheel is to supply a demand for a mover which has soil mevits and is light running division.

is to supply a demand for a mower which has real merits, and is light running, durable and easy to handle

14 in., \$5.00; 16 in., \$5.75;

18 in., \$6.25; 20 in., \$7.00.

Style M.—3 blades, 7-inch wheel, 5½-inch solid cylinder, with blades bolted on. This is the original Philadelphia 1870 pattern mower, and for general purpose is very popular, adapted for rough as well as smooth lawns.

14 in., \$5.00: 16 in., \$5.75: 18 in.

14 in., \$5.00; 16 in., \$5.75; 18 in., \$6.25; 20 in., \$7 00. TRIUMPH LAWN MOWER.-14 in., \$3.00; 16 in., \$3.25.

VICTORY, BALL BEARING.

The Victory Ball Bearing Mower is one of the lightest working. The adjustments are the simplest, most perfect and most positive. The Cutter Bar can be removed for sharpening by loosening four small screws.

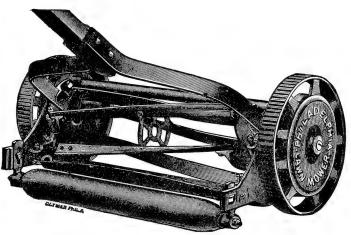

A Solid Rectangular Frame, that cannot be twisted or jarred out of parallel; the two side frames being bound tightly together by means of two cold die drawn steel bolts, which make the most rigid frame ever

Double Steel Ratchet, like lightning in action, like adament in hardness and durability. By using two pawls in each pinion the chances of the pawls engaging the clutch part of the pinion are doubled, and the

durability is increased ten-fold.

Triple Gear entirely enclosed, so that no dirt or cut grass can find its way into the pinions and clog them.

Manufactured from the highest quality of steel and iron, and a strictly High Grade Lawn Mower. 16 in., \$8.50; 18 in., \$9.25; 20 in., \$10.00.

COLDWELL'S IMPROVED HORSE LAWN MOWER.

These mowers are fitted up throughout with the best steel shafting, composition bushings or bearings, polished oak foot boards. Loring Coe knives, etc. These mowers have been adopted by the United States Government and by the New York City Park Board after competitive exhibitions of working, work done and durability.

Easy draft. Large drive rollers, affording traction without tearing lawn.

Non-elogging eastor wheels that will not mark the lawn. Simplicity of mechanism for throwing in and out of gear (without driver

leaving his seat.)

Device for adjusting both sides of the machine at once for height of cut (making it impossible to cut the lawn unevenly.)

Device for instantly raising all knives from the ground when passing over stones or other obstructions, or when drawing over a roadway (saves the knives and machine)

Side draft attachment, adjustable to either side of the machine, to prevent horse from walking on grass before it is cut.

30 and 35-inch complete with shafts. Special quotations on application.

THE MODEL HAND LAWN SWEEPER.

Designed for use on Lawns, Parks, Tennis Courts, etc. The brush revolves very rapidly, throwing the litter backward from its under surface. Immediately behind the brush and parallel with it, a thin shoe passes along over the ground, with its upper surface inclined. If sticks, stones or leaves are encountered, the shoe does not allow them to pass under it, but provides a passage over it into the hopper. The hopper can be dumped or taken out and emptied. It takes only a few minutes to go over a large lawn. The machine weighs twenty-eight pounds, is twenty-five inches wide, twenty-one inca brush.

GRASS CATCHER .- The Triumph. Is made of strong canvas; gathers all the Grass and can be adjusted to any machine in a moment,

CLIPPPER SEED MILLS.-These mills are especially adapted for cleaning grain, clover and timothy seed.

"Planet Jr." Farm and Garden Tools.

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue free to any who desire it. "Planet Jr." goods are standard machines; the best, and you can rely on getting bottom prices from us on any of the "Planet Jr." goods.

A seeder that does not drop in hills is fast becoming a thing of the past. Why? Because all crops that are to be grown from seed an 1 to inned to a regular stand, should be planted in hills at just the di-tance apart the plants are desired, for in drilling, unless the seed is sown unnecessarily thick, there will not always be a plantat the proper spot, and the crop is therefore irregular. This machine not only sows in a continuous row, but also drops in hills, 4, 6, 8, 12 and 24 inches apart. We can heartily recommend it Price, \$9.50.

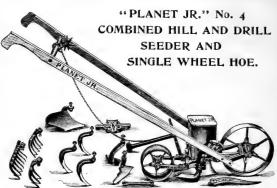

"Planet Jr." No. 12 Double Wheel Hoe, Cultivator, Rake and Plow.

This tool combines in itself the good points of its predecessors, with valuable new ideas. It has 11 in. wheels, which can be set at four different distances apart. The frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and the arch is of stiff steel, unusually high. The design of the frame is new, allowing the changes of the tools to be made without removal of the nuts from the standards. The machine has an unusually large equipment, seven pairs of tools in all, and the amount of work possible with this machine is almost incredible, covering the whole range of wheel hoe work both in the garden and on the farm, and has our unqualified endorsement. Price, complete, \$6.00.

Probably no other cultivating machine is so widely known as the "Planet Jr." No. 8 Horse Hoe and Cultivator. It is so strongly built as to stand incredible strain, yet it is light and easily handled. Every part of the tool is perfected to make it valuable to the intelligent farmer, who knows the best is always the cheapest.

This is exactly the same style of seeder as the No. 3 "Planet Jr." Hill Dropper. It is smaller in c pacity, though still of good size, holding two quarts. It drops in hills the same as the No. 3, and in drills any thickness, handling the smallest paper of seeds perfectly. It is simple, durable and very light running. Thrown out of gear instantly and the flow of seed cut off, by simply raising the handles. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family. Price, \$10.50. As a Drill only, \$7.50. Without Rakes, \$9.50.

"Planet Jr." No. 17 Single Wheel Hoe, Cultivator, Rake and Plow,

This latest and best Single Wheel Hoe has an 11-inch wheel with broad face, and a conveniently arranged and very valuable set of tools. It is very light, strong and easy running. Has adjustable handles and frame, and is the most perfect Wheel Hoe for market gardeners and private places. Frame changes in height; and the wheel to the other side of the frame, to allow of hoeing both sides of the row at one passage. Price, \$4.25.

"Planet Jr." Twelve Tooth Harrow, Cultivator and Pulverizer.

PRICES:
Without Pulverizer or Wheel, \$5.00
Without Pulverizer, \$6.00
Complete, \$7.50

Price:
Plain, \$6.50
With Wheel, 8.25
Complete, 10.00

This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame, and the chisel shaped teeth cut an inch wide; each. Hand levers regul to, width and depth while in motion, and the pulverizer prepares the ground capitally for the Seed Drill or for plant setting, and controls the depth of the rear teeth. It contracts to 12 inches and expands to 32 inches. Cultivates without throwing earth upon the plants, and the smooth, round throated teeth turn strawberry runners without injuring them.

For cutting strawberry runners, we make a special attachment consisting of a 10-inch flat steel disk, mounted on an out rigger. Price cxtra, \$1.75.

All Seeds in packets, ounces and quarter pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

View of Lawn at "The Pines," Residence of Albert McCullough.

McCULLOUGH'S "Suburban" Lawn Grass Seed

Is a mixture of the finest Dwarf Evergreen Grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained. Our mixture is the result of several years experimenting, and, as we now offer it, it is unequaled: the immense quantity we annually sell is the best proof we can offer. The quantity required for making a handsome lawn is four bushels (64 lbs.) per acre, or for renovating old lawns, two bushels, (32 lbs.) per acre. For a plot 15 x 20, or 300 square feet, one pound is required for a new lawn, or about half a pound for renovation.

How to make a Lawn.—A fine lawn is an unfailing mark of intelligence and taste, to obtain which the main point is to start right. It is now a decided fact that seed will make a better lawn than turf or sod. The best soil is a good medium texture, neither very heavy or excessively light; the surface should be raked repeatedly, thoroughly pulverized, and smoothed to the desired grade; remove all large stones, roots, and hardened pieces of earth that can not be readily broken. As portions sink, the hollows should be firmly filled, ample time being allowed for the thorough settling of the soil, which is greatly aided by a few heavy showers of rain, and at the best time for lawn-making (April) these are usually sufficiently abundant. When the soil is firm, level and suitably moist, sow "Suburban" Lawn Grass Seed at the rate of four bushels (64 lbs.) per acre. One pound is sufficient to sow a small varid is 20 feet, or 300 square feet. It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then rake lightly and then give a thorough rolling or pat well with the back of a spade. The seed must be well firmed in the soil. When the young grass attains a height of three or four inches, earefully mow with a sharp scythe. After this, according to the season, it should be mown with a lawn mower every week or ten days. Each season the cultivated grasses after going to seed, lay dormant; at this time wild grass will appear to some extent but only for a short time, as it will succumb to the vigorous second growth of the other.

Renovating Lawns.—When your lawn has already been established, you will find it to your advantage to lightly re-seed each season. As early as possible, carefully rake off all dead leaves, etc., and sow "Suburban" Lawn Grass Seep at the rate of two bushels (32 lbs.) to the acre; roll thoroughly or pat well with the back of a spade. To preserve a lawn in good condition, an annual dressing of "Suburban" Lawn Fertilizer (500 to 600 lbs. to the acre) should be used.

Price: 1/1b., 15c; 11b. 25c; 51bs. \$1.00; 1 bu. of 16 lbs. \$3.00. If wanted by mail add 10c per lb. extra.

McCullough's Lawn Grass for Shady Places,—On nearly all lawns there are shaded bare and unsightly spots on which the owners have difficulty in getting a stand of grass; for such places this mixture is adapted. It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour" or drainage defective, it is up to be covered with moss. If such is the case apply some lime or land plaster to sweeten it, but the moss should first be removed by the use of a sharp rake, then sow the seed at the rate of 4 bushels (64 lbs.) per acre.

Price: 11b. 40c; 51bs. \$1.50; 1 bu. of 161bs. \$4.50. By mail 10c per lb. extra.

McCullough's Golf Link Grass Seed.—We have given much attention to grasses for Golf Links. The mixtures we offer below are composed of such varieties as will thrive here, and are the result of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on the Golf Links.

We have always on hand all the natural grasses of Europe and America, and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the Links may be for poor land or rich, high and dry, or low and wet.

Putting Green Mixture.—A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve the more it is tramped on.

Per lb. 30c; 5 lbs. \$1.40; 1 bu. of 16 lbs. \$4.00. By mail 10c per lb. extra

Golf Link Mixture. For the grounds in general.

Per lb. 20c; 5 lbs. 80c; 1 bu. of 16 lbs. \$2.25. By mail 10c per lb. extra.

McCullough's Terrace Mixture. There is nothing more annoying than to have ground washed out. In this mixture we have put quick growing and deep-rooted grasses. Of course it depends a great deal on this being well started before a wash-out.

Per 1b. 30c; 51bs. \$1.40; 1 bu. of 161bs. \$4.00. By mail 10c per 1b. extra.
